World History In Documents A Comparative Reader:

World History in Documents Peter N. Stearns, 2008-04-15 Promotes the ability to study history with primary sources and the ability to compare aspects of major societies *World History in Documents* Peter N. Stearns, 1998 *World History in Documents* Peter N. Stearns, 2008-04-15 While world history materials date back to prehistoric times the field itself is relatively young Indeed when the first edition of Peter Stearns's best selling *World History in Documents* was published in 1998 world history was poised for explosive growth with the College Board approving the AP world history curriculum in 2000 and the exam shortly thereafter At the university level survey world history courses are increasingly required for history majors and graduate programs in world history are multiplying in the U S and overseas World events have changed as rapidly as the field of world history itself making the long awaited second edition of *World History in Documents* especially timely In addition to including a new preface focusing on current trends in the field Stearns has updated forty percent of the textbook paying particular attention to global processes throughout history The book also covers key events that have altered world history since the publication of the first edition including terrorism global consumerism and environmental issues **Focus on World History** Kathy Sammis, 2002-09 Topics include Empires and societies of Eurasia European Renaissance and Reformation Causes and consequences of the age of revolutions Interactions and conflicts between Europe and Asia **The Material of World History** Tina Mai Chen, David S. Churchill, 2015-03-27 This volume considers the confluence of World History and historical materialism with the following guiding question in mind given developments in the field of historical materialism concerned with the intersection of race gender labour and class why is it that within the field of World History historical materialism has been marginalized precisely as World History orients toward transnational socio cultural phenomenon micro studies or global histories of networks Answering this question requires thinking in an inter related manner about both the development of World History as a discipline and the place of economic determinism in historical materialism This book takes the position that historical materialism as applied to the field of World History needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist cultural analysis in studies of global capitalism At the same time World History needs to be more self critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural social and intellectual dimensions of global processes **The Twentieth Century** Kathy Sammis, 2002 Topics include Reform and revolution in China Russia and Mexico World War I The world between wars World War II Post World War II to current times **Teaching American History in a Global Context** Carl J.
