1000

Our first decision (Fig. 1a–c) was whether to use the 10-year mean or the 10-year median. The 10-year mean was chosen because it is the standard metric used in the literature. However, the 10-year median was also considered because it is less sensitive to outliers. The 10-year median was found to be more robust to outliers than the 10-year mean, but it was not chosen because it is not the standard metric used in the literature.
