Tools to Aid Environmental Decision Making Virginia H. Dale, Mary R. English, 1999 This text identifies and presents tools to environmental decision makers to help them improve the quality and clarity of their work These tools range from software to policy approaches and from environmental databases to focus groups Tools to Aid Environmental Decision Making Virginia H. Dale, Mary R. English, 2012-11-26 Environmental decision making is like politics mostly local In fact making decisions about the environment at the subnational level in state regional and local jurisdictions is a lot like politics For resolving environmental issues demands but often resists a balance between deeply held feelings and stark confrontations among opposing views This volume describes tools that should make the decision makers lot a bit more tolerable The authors would be the last to suggest that these decision aiding tools will somehow bring a benign order to issues that reach to people s fundamental values What they can help do is to keep the debate focused on the important issues to serve up useful options and to narrow the range of disagreement Even this is a challenging assignment Still why bother The chief reason is that the locus of environmental decision making has in the past decade or so shifted from the national to the subnational level a convenient if colorless term to denote the hurly burly of environmental controversy outside the Washington Beltway For example New England has taken a regional stand on tropospheric ozone control and California requires automotive pollution controls that some other jurisdictions have partially adopted This shift is a profound but not unexpected result of the way environmental policy has evolved since the modern environmental movement began around the late 1960s Back then the pendulum was swinging the other way Comparative Risk Assessment and Environmental Decision Making Igor Linkov, Abou Bakr Ramadan, 2006-03-02 Decision making in environmental projects is typically a complex and confusing process characterized by trade offs between socio political environmental and economic impacts Comparative Risk Assessment CRA is a methodology applied to facilitate decision making when various activities compete for limited resources CRA has become an increasingly accepted research tool and has helped to characterize environmental profiles and priorities on the regional and national level CRA may be considered as part of the more general but as yet quite

academic field of multi criteria decision analysis MCDA Considerable research in the area of MCDA has made available methods for applying scientific decision theoretical approaches to multi criteria problems but its applications especially in environmental areas are still limited The papers show that the use of comparative risk assessment can provide the scientific basis for environmentally sound and cost efficient policies strategies and solutions to our environmental challenges

Decision Support Systems for Risk-Based Management of Contaminated Sites Antonio Marcomini, Glenn Walter Suter II, Andrea Critto, 2008-12-16 *Decision Support Systems for Risk Based Management of Contaminated Sites* addresses decision making in environmental risk management for contaminated sites focusing on the potential role of decision support systems in informing the management of chemical pollutants and their effects Considering the environmental relevance and the financial impacts of contaminated sites all over the post industrialized countries and the complexity of decision making in environmental risk management decision support systems can be used by decision makers in order to have a more structured analysis of a problem at hand and define possible options of intervention to solve the problem Accordingly the book provides an analysis of the main steps and tools for the development of decision support systems namely environmental risk assessment decision analysis spatial analysis and geographic information system indicators and endpoints Sections are dedicated to the review of decision support systems for contaminated land management and for inland and coastal waters management Both include discussions of management problem formulation and of the application of specific decision support systems This book is a valuable support for environmental risk managers and for decision makers involved in a sustainable management of contaminated sites including contaminated lands river basins and coastal lagoons Furthermore it is a basic tool for the environmental scientists who gather data and perform assessments to support decisions developers of decision support systems students of environmental science and members of the public who wish to understand the assessment science that supports remedial decisions

Using Ecological Models to Support and Shape Environmental Policy Decisions Chiara Piroddi, Diego Macias, Marilaure Gregoire, Johanna Jacomina Heymans, Howard Townsend, 2022-02-10 *Forum for Applied Research and Public Policy*, 1999 *William R. and Evidence-Based Policy Making Stephen Wise, Max Craglia, 2007-12-28 Although much has been written on evidence based policy making this is the first volume to address the potential of GIS in this arena *GIS and Evidence Based Policy Making* covers the development of new methodological approaches emphasizing the identification of spatial patterns in social phenomena It examines organizational issues including the **Applying Ecological Principles to Land Management**

Virginia H. Dale, Richard A. Haeuber, 2011-06-27 This volume applies ecological principles and guidelines to understand past and current land use and land management and more importantly endeavors to promote more ecologically sound approaches

to future land use and management decisions The volume incorporates case studies from a wide variety of disciplines and perspectives The case studies explore past and current land use decisions on both public and private lands and include practical approaches and tools for land use decision making Perhaps the most important feature of the book is the linking of ecological theory and principle with applied land use decision making the theoretical and empirical are joined through concrete case studies of actual land use decision making processes In this volume readers will find a statement of fundamental ecological principles that are relevant for land use planning and management coupled with multiple in depth explorations of the application of these principles in action In addition most case studies describe specific tools and approaches for incorporating endeavors to join fundamental ecological knowledge with cutting edge application in order to both educate and provide concrete guidance for decision making The intended audience is broad and multidisciplinary from undergraduate and graduate level courses in environmental studies to professional land use planners

Biotechnological Interventions in the Removal of Emerging Pollutants Satarupa Dey, Sayan Bhattacharya, 2025-02-24 This book focuses on the most recent developments in bioremediation techniques exploring how microorganisms can break down different pollutants and the future potential of bioremediation to reduce global pollution levels It examines the impact of various emerging pollutants on the environment and the health of living organisms while highlighting recent advancements in bioremediation methods needed to degrade these pollutants Addressing both inorganic and organic compounds from industrial and anthropogenic activities including personal care products endocrine disruptors and pharmaceutical products this book tackles pollutants that escape conventional water treatment processes contaminating groundwater soil sediments and oceans The chapters also cover topics such as the toxicity and health impacts of emerging pollutants ecotoxicological effects of nanoparticles policies related to emerging pollutants technologies for their detection and technological aspects of their fate during wastewater treatment Readers will find a comprehensive examination of the roles of microbes in bioremediation including the elimination degradation detoxification and immobilization of pollutants The book also introduces enzyme biotechnology as a cost effective low energy eco friendly technology for treating various pollutants Furthermore it discusses the combination of physical treatment and nanotechnology for sustainable pollutant removal This book serves as a valuable resource for policymakers aiming to develop effective environmental regulations educators seeking comprehensive educational material researchers looking to expand their knowledge on advanced bioremediation techniques climate change scientists dedicated to mitigating pollution and undergraduate and graduate students studying agriculture forestry ecology soil science or environmental sciences

Zhou,W.

Kainz,2003-01-01 While traditional aspects of GIS have been growing rapidly in recent years new developments have focused on the geographic information service and delivery which will realise the benefits of spatial information to the community The analysis and application of spatial information for decision support systems is an important development in realising these benefits This book is a collection of peer reviewed articles presented at the ISPRS Workshop on Spatial Analysis and Decision Making in Hong Kong in 2003 It covers topics such as image based spatial analysis and decision making 3 D modelling and analysis general spatial analysis methodology web and mobile based analysis knowledge based systems integrated systems visualisation and representation methodology and some application systems **Environmental**

Decision-Making in Context Chad J. McGuire,2017-09-25 Because of the complexity involved in understanding the environment the choices made about environmental issues are often incomplete In a perfect world those who make environmental decisions would be armed with a foundation about the broad range of issues at stake when making such decisions Offering a simple but comprehensive understanding of the critical roles science economics and values play in making informed environmental decisions Environmental Decision Making in Context A Toolbox provides that foundation The author highlights a primary set of intellectual tools from different disciplines and places them into an environmental context through the use of case study examples The case studies are designed to stimulate the analytical reasoning required to employ environmental decision making and ultimately help in establishing a framework for pursuing and solving environmental questions issues and problems They create a framework individuals from various backgrounds can use to both identify and analyze environmental issues in the context of everyday environmental problems The book strikes a balance between being a tightly bound academic text and a loosely defined set of principles It takes you beyond the traditional pillars of academic discipline to supply an understanding of the fundamental aspects of what is actually involved in making environmental decisions and building a set of skills for making those decisions
