University Prep Math And Science High School:

Exam Schools Chester E. Finn, Jr., Jessica A. Hockett, 2012-09-16 An in depth look at academically selective public high schools in America What is the best education for exceptionally able and high achieving youngsters Can the United States strengthen its future intellectual leadership economic vitality and scientific prowess without sacrificing equal opportunity There are no easy answers but as Chester Finn and Jessica Hockett show for more than 100 000 students each year the solution is to enroll in an academically selective public high school Exam Schools is the first ever close up look at this small sometimes controversial yet crucial segment of American public education This groundbreaking book discusses how these schools work and their critical role in nurturing the country s brightest students The 165 schools identified by Finn and Hockett are located in thirty states plus the District of Columbia While some are world renowned such as Boston Latin and Bronx Science others are known only in their own communities The authors survey the schools on issues ranging from admissions and student diversity to teacher selection They probe sources of political support curriculum instructional styles educational effectiveness and institutional autonomy Some of their findings are surprising Los Angeles for example has no exam schools while New York City has dozens Asian American students are overrepresented but so are African American pupils Culminating with in depth profiles of eleven exam schools and thoughtful reflection on policy implications Finn and Hockett ultimately consider whether the country would be better off with more such schools At a time of keen attention to the faltering education system Exam Schools sheds positive light on a group of schools that could well provide a transformative roadmap for many of America s children

Faculty and First-Generation College Students: Bridging the Classroom Gap Together Vickie L. Harvey, Teresa Heinz Housel, 2011-09-26 Gain a greater understanding of the academic cultural and social experiences of first generation college students FGS Fascinating heart touching and important the research and the stories presented here enlighten what FGS often have to overcome to successfully complete their degrees With an emphasis on improving FGS college success retention and graduation rates this volume first covers common obstacles and the trend of FGS continuing on for graduate degrees Section Two discusses the complex interplay of social academic emotional and financial influences on academic performance The chapters collectively affirm that the commitment of university resources is critical to college success This is the 127th volume of the Jossey Bass higher education quarterly report New Directions for Teaching and Learning which offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers

School Social Work Services in Federally Funded Programs Hope M. Bland, Ashraf Esmail, 2012-10-08 This book identifies the barriers between social work intervention in education and government funded programs that impact African American students The chapters approach these issues from a child centered perspective which has proven critical in developing positive and sustainable relationships with African American students As children begin to understand more

about their lives and the world around them they also develop opinions that help them identify who they are as individuals and where they see themselves in the world From a qualitative research methodology approach trust has been identified as a fundamental factor and potential barrier among all variables acknowledged Interviews with ten African American high school and college students were conducted to discuss their perspectives on education family life peer interaction and social work intervention

Promise and Dilemma Eugene Y. Lowe, Jr., 2021-02-09 Issues of diversity and affirmative action have turned elite higher education in the United States into contested terrain Rights revolutions in the country have raised hopes that have proved difficult to fulfill Most particularly expectations about access and opportunity redressing the unfairness of the past have collided with widely held beliefs that educational institutions should treat each person fairly as an individual and should promote high academic standards Promise and Dilemma gathers the reflections of a group of leading educators on whether and how objectives of diversity equity and excellence can be simultaneously pursued Empirical in orientation these essays focus on constructive proposals and on the role of social and political consensus Furthermore they contrast what we believe we know with what empirical data and institutional experience can teach us Eugene Lowe s substantive introduction reviews the history of the practice of affirmative action in colleges and universities The other essays are by L Scott Miller of The College Board Mamphela Ramphele vice chancellor of the University of Cape Town Neil J Smelser of the Center for Advanced Study in the Behavioral Sciences Stanford and Claude M Steele of Stanford University Also included are commentaries by Randall Kennedy Harvard Law School Richard J Light John F Kennedy School of Government Harvard University Chang Lin Tien the University of California Berkeley and Philip Uri Treisman the University of Texas

The Algebra Conspiracy Michael Wiener, 2000-09 The Algebra Conspiracy is an irreverent radical politically incorrect passionate challenge to the increasingly popular program of the educational establishment which requires every student to take two to four years of college preparatory mathematics to earn a high school diploma These well meaning but misguided people are placing every secondary school student into Algebra Geometry and Trigonometry classes that they may not want that they may not need to fulfill requirements for future employment or that they may not be academically equipped to handle This means for instance that a youngster who has trouble adding common fractions computing with percents or even making change on a ten dollar purchase will nevertheless be required to pass Algebra and Geometry In many school districts this is already creating an academic nightmare as more and more math teachers are faced with the Hobson s choice of either failing many of their students who simply cannot handle Algebra and Geometry or handing out numerous gift D s or severely watering down the college prep mathematics curriculum so more students can pass the classes The author takes the controversial view that the Age of Technology notwithstanding a large percentage of today s secondary school youngsters could if allowed live their entire adult working lives very comfortably without ever being forced to set foot in Algebra and Geometry classrooms There are many other classes that these youngsters should be taking such as cultural or practical arts
