Workways Of Governance Monitoring Our Governments Health:

Workways of Governance Roger H. Davidson, 2004-05-13 A Brookings Institution Press and Governance Institute publication The war on terrorism has raised profound questions of domestic governance not primarily about power or policy but about the capacities of government agencies their personnel procedures work habits and styles and ability to interface with each other These are the workways of governance As the aftermath of the tragic events of September 11 2001 made very clear shortcomings and defects in the workways of governance are all too often manifested only in times of crisis or scandal after the damage is done How much better it would be to design for government a version of the periodic physical examination where tests of various types together with the physician s observations and the patient s own testimony combine to help define the patient s status and prospects The Workways of Governance project sponsored by the Governance Institute was begun in 1997 in response to a growing concern that institutions of national government have evolved into structures and developed procedures and customs that constrain their workers and hamper their collective effectiveness A unique feature of the project is the development of a periodic review of the quality of institutional life and work in government Guidelines for evaluating and monitoring governmental entities will be established and implemented annually or biennially The resulting reports consist of both objectively measured data and subjective evaluation with the ultimate aim of generating positive change toward improving the capacity of government In this first volume of analysis arising from the Workways of Governance project contributors apply these general guidelines to evaluate the leading institutions of the federal government as listed in the first three articles of the Constitution the House of Representatives the Senate the presidency focusing on White House organization and staffing the executive branch focusing on the civil service and the federal judiciary

From the Ground Up Stephen Kosack,Courtney Tolmie,Charles C. Griffin,2010-04-01 This book is based on a simple concept no one is in a better position to hold a government accountable than those it governs When governments fail to meet the needs of their citizens the international community often turns to large external organizations such as the International Monetary Fund or the World Bank These analysts and monitors may have the resources and expertise to analyze and advise on public spending and governance but where do they go when the time comes to implement new policies And can they really have a more nuanced understanding of the country s problems than its own citizens Who is there to watch day and night to hold the government accountable From the Ground Up proposes that the international community s efforts to improve public expenditure and budget execution decisions would be more effective if done in collaboration with local independent monitoring organizations Stephen Kosack Courtney Tolmie and Charles Griffin track the work of sixteen independent monitoring organizations from across the developing world demonstrating how these relatively small groups of local researchers produce both thoughtful analysis and workable solutions They achieve these results because their vantage point allows them to more effectively discern problems with governance and to communicate with their fellow citizens about the ideals and methods of good governance The authors also outline some disadvantages facing independent monitoring organizations such as insufficient resources inadequate access to data and too little influence with high government officials Collaboration with larger international organizations could help independent monitoring organizations overcome such

obstacles increasing their chances of improving governance from the ground up Governance for public health across the health and allied sectors World Health Organization, 2025-10-15 The diverse public health challenges require multisectoral integrated action supported by robust and well coordinated governance that involves actors within and beyond the health sector Framed around Essential Public Health Functions the report serves as a reference for national and global public health actors providing guidance to define and strengthen public health governance to ensure effective delivery of public health functions and services Specific objectives are to collate the current understanding of public health governance and develop an operational definition identify and describe the core components enablers and guiding principles required to improve public health governance across health and other sectors responsible for various aspects of population health promote the roles of existing institutional set up including ministries of health national public health institutes or their equivalent with heads of government in benchmarking and building public health governance considering the dispersed nature of public health stakeholders in countries The report is intended for national and subnational actors within and beyond the health sector who are involved in public health governance and in coordinating and delivering public health functions and services This includes governments ministries of health public health institutes research and professional bodies allied ministries with key responsibilities for public health such as finance planning local administration environment education agriculture and commerce and subnational authorities **The Changing National Role in Health System Governance** Elke Jakubowski, Richard B. Saltman, 2013 This study provides an overview of recent changes in national government's role in the governance of health systems in 12 countries Country assessments focus on recent efforts to reconfigure responsibilities for health policy regulation and management the resultant policy priorities and the initial impact Executive summary **Government and Policy for U.S. Health Leaders** Raymond J. Higbea, Gregory Cline, 2019-12-02 Written with graduate students in mind this balanced cross disciplinary text explores health policy from all directions theory philosophy ethics history economics analysis etc for a complete and thorough examination of policy today Its unique approach comprehensively explores the health policy process looking at why we are here how we got here and what are the outcomes Beginning with government political philosophy and health policy this comprehensive text moves before on to a thorough examination of international health comparisons political theory and the policy process The book concludes with health policy topical concerns policy outcomes and advocacy Its broad cross disciplinary approach to the health policy process makes this text an ideal well rounded resource for policy courses across the health professions *Smart Governance for Health and Well-being: the Evidence* World Health Organization. Regional Office for Europe, 2014 Governance for health describes the attempts of governments and other actors to steer communities whole countries or even groups of countries in the pursuit of health as integral to well being This study tracks recent governance innovations to address the priority determinants of health and categorizes them into five strategic approaches to smart governance for

health It relates the emergence of joint action by the health and non health sectors public and private actors and citizens all of whom have an increasing role to play in achieving seminal changes in 21st century societies The chapters presented here were initially commissioned as papers to provide the evidence base for the new European policy framework for health and well being Health 2020 Calling for a health in all policies whole of government and whole of society approach Health 2020 uses governance as a lens through which to view all technical areas of health Intersectoral Governance for Health in All Policies David V. McQueen, Matthias Wismar, Vivian Lin, Catherine Marie Jones, Maggie Davies, 2012 Health 2020 is the new health policy framework of the WHO European Region The policy aims at significantly improving the health and well being of populations reducing health inequalities strengthening public health and ensuring sustainable people centred health systems Health 2020 is for the whole of government and the whole of society It envisages actions and outcomes well beyond the boundaries of the health sector and beyond the remit of the ministry of health Health 2020 therefore proposes reaching out and working together with other ministries departments sectors organizations stakeholders and civil society organizations Health 2020 also proposes reaching out to and working together with citizens patients and consumers providing more opportunities for empowerment Progress towards all these goals will be achieved by policy action in four areas investing in health through a life course approach and empowering citizens tackling Europe s major disease burdens of noncommunicable and communicable diseases strengthening people centred health systems and public health capacities including preparedness and response capacity for dealing with emergencies and creating supportive environments and resilient communities This volume presents in a practical way an analysis of how to reach out and work together It focuses and gives clear advice on intersectoral governance structures that can facilitate intersectoral action It is hoped that the volume will help WHO Member States assess and revise their practices of intersectoral collaboration and inspire new ways of reaching out and working together We also hope that it will encourage the exchange of good practices between countries The book was developed in parallel with Health 2020 and it has continuously informed the technical consultations with Member States and experts that have taken place over the last two years It comes as part of a package of studies that has provided scientific background to the development of Health 2020 including a study on governance for health in the 21st century and a review of social determinants and the health divide both of which also provide examples on how to implement whole of society and whole of government approaches P ix **Global Health Justice and Governance** Dr. Prah Ruger, 2018-05-03 In a world beset by serious and unconscionable health disparities by dangerous contagions that can circle our globalized planet in hours and by a bewildering confusion of health actors and systems humankind needs a new vision a new architecture new coordination among renewed systems to ensure central health capabilities for all Global Health Justice and Governance lays out the critical problems facing the world today and offers a new theory of justice and governance as a way to resolve these seemingly intractable issues A fundamental responsibility of society is to ensure human flourishing The central role that

health plays in flourishing places a unique claim on our public institutions and resources to ensure central health capabilities to reduce premature death and avoid preventable morbidities Faced with staggering inequalities imperiling epidemics and inadequate systems the world desperately needs a new global health architecture Global Health Justice and Governance lays out this vision Governing for Health Fran Baum,2018-11-30 Some aspects of public health vary by locality or jurisdiction Political challenges are not one of them As governments on every scale become motivated by short term economic gains the essential causes of public health and equity are regularly subject to political questioning and financial shortcutting Governing for Health is a counterpoint to this myopic approach a passionate rigorous case for why the health of a society is both its greatest measure and its most untapped source of prosperity **Governing Global Health** Chelsea Clinton,Devi Sridhar,2017-01-12 The past few decades have seen a massive increase in the number of international organizations focusing on global health Campaigns to eradicate or stem the spread of AIDS SARS malaria and Ebola attest to the increasing importance of globally oriented health organizations These organizations may be national regional international or even non state organizations like Medicins Sans Frontieres One of the more important recent trends in global health governance though has been the rise of public private partnerships PPPs where private non governmental organizations for profit enterprises and various other social entrepreneurs work hand in hand with governments to combat specific maladies A primary driver for this development is the widespread belief that by joining together PPPs will attack health problems and fund shared efforts more effectively than other systems As Chelsea Clinton and Devi Sridhar show in Governing Global Health these partnerships are not only important for combating infectious diseases they also provide models for developing solutions to a host of other serious global health challenges and questions beyond health But what do we actually know about the accountability and effectiveness of PPPs in relation to the traditional multilaterals According to Clinton and Sridhar we have known very little because scholars have not accumulated enough data or developed effective ways to assess them until now In their analysis they uncovered both strength and weaknesses of the model Using principal agent theory in which governments are the principals directing international agents of various type they take a closer look at two major PPPs the Global Fund to Fight HIV AIDS TB and Malaria and the GAVI Alliance and two major more traditional international organizations the World Health Organization and the World Bank An even handed and thorough empirical analysis of one of the most pressing topics in world affairs Governing Global Health will reshape our understanding of how organizations can more effectively prevent the spread of communicable diseases like AIDS and reduce pervasive chronic health problems like malnutrition
