World Population Policies 2019

Highlights

When supported by appropriate policies, international migration can contribute to inclusive and sustainable economic growth and development. Target 10.7 of the Sustainable Development Goal (SDG) calls on countries to facilitate orderly, safe, regular and responsible migration and mobility of people, including through the implementation of planned and well-managed migration policies. The Global Compact for Safe, Orderly and Regular Migration, a non-legally binding framework for international cooperation among all relevant actors on migration, also recognized that migration is a source of prosperity, innovation and sustainable development and that these positive impacts can be optimized by improving migration governance.

This publication presents the highlights of the report *World Population Policies 2019*. It provides an overview of Government policies and programmes related to international migration, including policies to govern immigration and to address irregular migration. It reviews policy measures related to migrants' rights, including access to services, as well as policies to foster the integration of migrants into host societies. It also examines Government measures to maximize the development impacts of migration and to support diaspora involvement and migrant return.

Department of International Economic and Social Affairs, 1982 World Population Policies 2007 ,2008 **Population Policies and Economic Development** World Bank, 1974 This report provides information on world population growth its impact on efforts to combat poverty and improve standards of living its effects on the availability of food and other natural resources and its policy implications for governments and the international community The study s main focus is on the relationship between population growth and economic development and on government policies required to bring about a reduction in fertility Its central conclusion is that high rates of population growth and the massive poverty which burdens most of the developing world despite remarkable economic growth in the aggregate are mutually reinforcing resulting in a vicious circle which can be broken only

by a direct and simultaneous attack on both fronts The problem is how to mount such an attack effectively and to do so in time to forestall the most serious consequences implicit in the data this report contains That question is the object of a series of interrelated studies of which this is one that are being carried out by the World Bank and associated institutions in an effort to clarify the options available to policy makers and to stimulate necessary additional research on the part of others
