Worldwide Science And Technology Advice To The Highest Level Of Governments:

Worldwide Science and Technology Advice to the Highest Levels of Governments William T. Golden, First published in 1990 Routledge is an imprint of Taylor Francis an informa company **Worldwide Science and Technology Advice** William T. Golden, 2023-04-28 First published in 1990 The contributors discuss the organizations for provision of science and technology advice to the highest levels of governments of some 35 countries including major countries of the world and a selection of important smaller countries Inclusion of some communist and developing countries adds piquancy The papers comment on functioning of those organizations as well as describe their formal structure Each author was asked to describe the science and technology advising organizations for the highest level of his or her country s government and comment on its effectiveness and how it influences policy formulation and action *Worldwide Science and Technology Advice* William T. Golden, 2023 First published in 1990 The contributors discuss the organizations for provision of science and technology advice to the highest levels of governments of some 35 countries including major countries of the world and a selection of important smaller countries Inclusion of some communist and developing countries adds piquancy The papers comment on functioning of those organizations as well as describe their formal structure Each author was asked to describe the science and technology advising organizations for the highest level of his or her country s government and comment on its effectiveness and how it influences policy formulation and action **Science, Technology, and Government for a Changing World** Jimmy Carter, 1993-06 **Science Advice to the President** William T. Golden, 2017-09-29 This is a provocative behind the scenes introduction to the vital and complex role science plays in United States politics It includes the first formal statement from former President Clinton s former Science Advisor John H Gibbons a fresh retrospective from D Allan Bromley on science advice in the George H W Bush Administration and a unique viewpoint from John McTague about his brief tenure under President Reagan Among the twenty four contributors are former members of the President s Science Advisory Committee distinguished scholars and industrialists Science Advice To the President William T. Golden, Policy G. Bruce Doern, 2010 Essays in honour of one of Canada s finest scholars of public policy *Worldwide Science and Technology Advice to the Highest Levels of Governments* William T. Golden, 1991 *Scientists' Impact on Decision-making* Peng Ru, 2016-12-08 With the increasing influence of science and technology S T on socioeconomic life and public affairs there has been a growing demand for S T expertise in today s public decision making The National High Technology Research and Development Program 863 Program involving hundreds of S T experts marked the beginning of a new journey for China s high tech development This book discusses China s S T decision making mechanism with the 863 Program as the central case and scientist influence on public decision making as the focus More importantly it extracts three key elements to analyze the determinative factors behind that influence knowledge value and institutions and proposed a KIV framework of macro analysis The KIV being the first framework to generalize factors that could affect scientists influence on

public decision making is of both theoretical significance and innovative value In addition by finding out those factors this book attempts to create a decision making environment conducive to scientists contribution of their knowledge *Science, Technology, and Government for a Changing World* Carnegie Commission on Science, Technology, and Government,1993

The Advisers Bruce Smith,2010-12-01 America s governing system is unique in the extent to which scientists and other outside experts participate in the policy process This wide ranging study traces the rise of scientists in the policy process and shows how outside experts interrelate with politicians and administrators to produce a unique and dynamic policy process It also shows how the very openness of American government creates the potential for unusual conflicts of interest Bruce L R Smith focuses on the experiences of agency and presidential level advisory systems over the past several decades He chronicles the special complexities and challenges resulting from the Federal Advisory Committee Act the open meeting law to provide a better understanding of the role of advisory committees and offers valuable lessons to guide their future use He looks at science advice in the Departments of Defense State and Energy the National Aeronautics and Space Administration the Environmental Protection Agency and then examines how science advisory mechanisms have worked at the White House Rather than simply providing a description of structures and institutions Smith shows the advisory systems in action how advisory systems work or fail to work in practice He analyzes how the advisers influence the policymaking process and affect the life of the agencies they serve Smith concludes with an assessment of the relationship between science advice and American democracy He explains that the widespread use of outside advisers clearly reflects America s preference for pluralism By scrutinizing agency plans goals and operations advisers and advisory committees serve a variety of functions and attempt to strike a balance between openness and citizen access to government and the need for discipline and sophisticated expertise in policymaking At the root of the advisory process is a paradox scientists are called on because of their special expertise but they are useful onl **Current Literature on Science of Science** ,1992 Science and Technology Management Bibliography, 1993 Thomas E. Clarke,Jean Reavley,1993 This bibliography is the fourth edition in a series of bibliographies over the past 20 years containing references to articles books conference papers and reports concerned with the management of technological innovation and technical entrepreneurship Previous editions had the title R D Management Bibliography This edition contains over 10 000 references of which 3 000 were contained in the 1981 edition The section on government science and technology policy is one of the largest in the book *International Environmental Research and Assessment* Carnegie Commission on Science, Technology, and Government,1992 There is a conflict between the growing burdens that humans place on the environment and the resources of knowledge and money at hand to modify and adjust these burdens Growth in population and economic activity suggests that simply keeping pace with environmental needs is likely to become harder This report focuses on institutions for the development of knowledge about environmental problems and for the synthesis and assessment of this knowledge for the purpose of informing policy Proposals made in the

report include a recommendation to strengthen the international assessment of environmental issues and the integration of scientific and technical assessments in international policy making One suggested approach is through building the advisory capacity of such international nongovernmental scientific organizations as the International Council of Scientific Unions Another approach would be to strengthen the role played in countries other than the U S by foreign counterparts of the U S White House Office of Science and Technology Policy the Congressional Office of Technology Assessment and the National Research Council and by establishing or improving international links between these organizations The report contains five chapters 1 Introduction 2 Environmental Lessons of the Past 20 Years 3 Strengthening the Worldwide Environmental Research Capability including the need for research and training 4 Strengthening International Assessment and Advisory Mechanisms and 5 Coda The appendixes present a section on environmental trends since 1970 biographies of principal contributors to this report and a list of participants in the Workshop on International Environmental Organization The Science and Technology Dimensions held in June 1990 at Rockefeller University that initiated this report Contains 29 references MCO

Higher Education Management ,1993 *UN Millennium Development Library: Investing in Development* Jeffrey D. Sachs, The UN Millennium Project, 2019-06-03 The Millennium Development Goals adopted at the UN Millennium Summit in 2000 are the world s targets for dramatically reducing extreme poverty in its many dimensions by 2015 income poverty hunger disease exclusion lack of infrastructure and shelter while promoting gender equality education health and environmental sustainability These bold goals can be met in all parts of the world if nations follow through on their commitments to work together to meet them Achieving the Millennium Development Goals offers the prospect of a more secure just and prosperous world for all The UN Millennium Project was commissioned by United Nations Secretary General Kofi Annan to develop a practical plan of action to meet the Millennium Development Goals As an independent advisory body directed by Professor Jeffrey D Sachs the UN Millennium Project submitted its recommendations to the UN Secretary General in January 2005 The core of the UN Millennium Project s work has been carried out by 10 thematic Task Forces comprising more than 250 experts from around the world including scientists development practitioners parliamentarians policymakers and representatives from civil society UN agencies the World Bank the IMF and the private sector Investing in Development A Practical Plan to Achieve the Millennium Development Goals brings together the core recommendations of the UN Millennium Project By outlining practical strategies and approaches to financing the the report presents an operational framework that will allow even the poorest countries to achieve the Millennium Development Goals by 2015
