Narendra Kumar Sharma,Tikam Chand Dakal,Pawan Kumar Maurya,Gulshan Wadhwa,2025-04-17 By consistently dedicating efforts to multi omic and other high throughput technologies it is expected that RNA therapies will have a vital role in future personalized medicine approaches for cancer therapy Within this framework analyzing the genetic sequence of a patient s tumor would allow for the detection of crucial driver mutations or changes that cause resistance to drugs These mutations may then be targeted with RNA therapies that are particularly designed to treat those particular variations Recent clinical trials have shown that RNA based therapies hold great potential for treating several illnesses However further investigations are required to improve the delivery materials and understand the RNA alterations linked to these groundbreaking drugs in order to facilitate their integration into clinical practice Ideally these therapeutic substances would be specifically administered to the tumor cells of interest using a targeted delivery agent In this hypothetical situation the choice of medications for cancer patients would differ depending on the precise abnormalities detected in each person potentially including inhibitors that target circuits known to cause resistance to treatments However doing a more thorough assessment of the challenges and potential benefits discussed in each chapter would enhance the capacity to critically analyze this rapidly evolving field of therapies This book largely examines the latest developments and clinical studies related to RNA based medications while also examining the challenges and future possibilities linked with them This method shows potential for greatly improving the prognosis of cancer patients **Exhibitions Beyond Boundaries** Harriet Atkinson,Verity Clarkson,Sarah A. Lichtman,2022-12-01 After World War II museum and gallery exhibitions industrial and trade fairs biennials triennials festivals and world s fairs increasingly came to be used as locations for the exercise of soft power for displays of cultural diplomacy between nations and as spaces for addressing areas of social and political contestation Exhibitions Beyond Boundaries opens with a substantial introduction to the key debates followed by case studies that advance the field of exhibition histories both geographically and methodologically focusing on postwar transnational exchange and the wider networks engendered through exhibitions Chapters trace relations across Africa Asia Europe the Middle East the Pacific and the United States of America drawing on a range of approaches and perspectives principally from art and design history but also from social economic and political history and museum studies Featured case studies include the presentation of African American Art at FESMAN 66 and FESTAC 77 the US s 1961 Small Industries Exhibition in Colombo Israel s early appearances at the Venice Biennale the Vatican Pavilion at the 1964 1965 New York World s Fair and Hong Kong s Pavilion at Expo 70 in Tokyo **The Evolution of Knowledge** Jürgen Renn,2022-05-03 A fundamentally new approach to the history of science and technology This book presents a new way of thinking about the history of science and technology one that offers a grand narrative of human history in which knowledge serves as a critical factor of cultural

Planning in Cold War Europe Michel Christian, Sandrine Kott, Ondrej Matejka, 2018-10-08 The idea of planning economy and engineering social life has often been linked with Communist regimes will of control However the persuasion that social and economic processes could and should be regulated was by no means limited to them Intense debates on these issues developed already during the First World War in Europe and became globalized during the World Economic crisis During the Cold War such discussions fuelled competition between two models of economic and social organisation but they also revealed the convergences and complementarities between them This ambiguity so often overlooked in histories of the Cold War represents the central issue of the book organized around three axes First it highlights how know how on planning circulated globally and were exchanged by looking at international platforms and organizations The volume then closely examines specificities of planning ideas and projects in the Communist and Capitalist World Finally it explores East West channels generated by exchanges around issues of planning which functioned irrespective of the Iron Curtain and were exported in developing countries The volume thus contributes to two fields undergoing a process of profound reassessment the history of modernisation and of the Cold War
