Berlin as evidence that community is not an entity but is produced by instrumentalizing specific forms of identification and boundary making In examining the role of community in the case of her participants Kulkul finds that religion and culture are important not for the values they perpetuate but for their role in forming and sustaining the community She looks at the importance of boundaries and especially their reciprocity Social boundaries are a set of codes of exclusion often used against migrants and refugees while symbolic boundaries are typically understood as the way one defines one's own group Kulkul argues that these two types of boundaries tend to trigger each other and thus be mutually reinforcing At the same time she presents a picture of everyday life from the perspective of migrants and the children of migrants in a cosmopolitan European city Berlin A valuable read for scholars of migration and culture which will especially interest scholars focused on Europe

Language and Space Peter Auer, Jürgen Erich Schmidt, 2010 The dimensions of time and space fundamentally cause and shape the variability of all human language To reduce investigation of this insight to manageable proportions researchers have traditionally concentrated on the deepest dialects But it is increasingly apparent that although most people still speak with a distinct regional coloring the new mobility of speakers in recently industrialized and postindustrial societies and the efflorescence of communication technologies cannot be ignored This has given rise to a reconsideration of the relationship between geographical place and cultural space and the fundamental link between language and a spatially bounded territory Language and Space An International Handbook of Linguistic Variation seeks to take full account of these developments in a comprehensive theoretically rich way The introductory volume examines the concept of space and linguistic approaches to it the structure and dynamics of language spaces and relevant research methods A second volume offers the first thorough exploration of the interplay between linguistic investigation and cartography and subsequent volumes uniformly document the state of research into the spatial dimension of particular language groupings Key features comprehensive coverage of the field in terms of theory and methods the unique volume stands alone since it neither is a handbook of dialectology or of areal linguistics nor a handbook on language variation alone gathers together a great number of distinguished scholars and experts in the field

Humanitarianism from Below Alejandro Olayo-Méndez, 2025-08-05 Challenges the definition of humanitarian aid Aside from being one of the most important migration corridors in the world Mexico is becoming an immigrant destination itself with more and more migrants deciding or needing to stay in the country after failing to enter the United States In the absence of state aid migrant shelters have emerged as an informal welfare system for migrants asylum seekers refugees and deportees in Mexico Largely run by faith based humanitarian organizations these shelters have grown significantly in recent years Humanitarianism from Below examines the significance of these casas de migrantes migrant shelters in the migration process in Mexico The book also reviews the role of faith based humanitarian organizations whose engagement with migrants is perceived more as charity work than professional humanitarian work The volume argues that faith based humanitarian organizations work challenges traditional understandings of what counts as humanitarian aid It

makes the case that in order to understand the full ecology of migration we need to understand not only how large organizations like the Red Cross work but also how these smaller and local entities with fewer resources interact with migrants on their journeys Most migration research tends to focus on its impact within home countries or in destination contexts rarely focusing on the actual migration process including the interactions that influence the course of the migration journey itself In conducting this research Alejandro Olayo M ndez traveled along migrant routes several times in order to gain knowledge about how migrants move and how they interact with the migrant shelters He offers a detailed look at the experiences and challenges of casas de migrantes in Mexico situating these faith based shelters as an integral part of Mexico s humanitarian ecosystem

Iran and the International System Anoushiravan Ehteshami, Reza Molavi, 2012-03-29 Much attention in the West has focused on Iran as a problem country This book challenges the representations of Iran as a hostile regional power led by ideologues and goes further by discussing how international relations are viewed from inside Iran itself outlining the factors which underpin Iranian thinking on international relations and considering what role Iran as a large and significant country in the Middle East ought to play in a fairly constructed international system The book is written by leading scholars and policy makers from inside as well as from outside Iran and includes academics with unparalleled access and insights into the world views of the Iranian leadership Subjects covered include the rationale of Iran s Islamic constitution including its electoral system and the impact this has on international relations Iran s view of the ideal international system including the place therein of ethics justice and security Iran s international interests including energy needs and relations with the West including the clash between Iranian and Western views of the world order

of the canonical formulation of assimilation theory and an understanding of the key themes and issues contained in current efforts to rethink and revise the classical perspective for today's changing world

South Asian Migration Zaara Zain Hussain, Md Mizanur Rahman, 2015-09-04 International migration is a dynamic global phenomenon that has been drawing increasing attention from both scholars and policymakers over the last few decades. It is particularly relevant to South Asia since the region is a vast source of sojourner migrant labour as well as home to permanent immigrant and diaspora communities. The chapters brought together in this volume provide insights into the study of international migration, diaspora engagement and remittances in South Asia. In particular, they analyse the implications of this phenomenon in relation to development and shed light on migration and diaspora-led development in two sections: firstly, Remittance Induced Development and secondly, Diaspora Induced Development. The geographic focus of the volume is the global South Asian emigrant population who live outside the region. This volume demonstrates that international migration, remittances and development offer an exciting field of academic study as well as a vibrant area of policy study. Its multi-disciplinary dimensions enlarge its scope and applicability across several domains. As such, this volume offers an important contribution to the growing field of international migration in both the academic and policy spheres.

Cultures of Transnationality in European Migration Karolina Bargłowski, 2019-06-05 Transnational mobility in the EU has become a key factor for supranational integration, equal life chances and socioeconomic prosperity. This book explores the cultural and social patterns that shape people's migration, the historical and contemporary patterns of their movement and the manifold consequences of their migration for themselves and their families. Exploring the links between social and spatial mobility, the book draws attention to the complexity of moving and staying as ways in which social inequalities are shaped and reinforced. Grounded in research conducted in Germany and Poland, the book develops the concept of cultures of transnationality to analytically frame the variety of expectations involved in migration and how they shape migration dispositions, opportunities and outcomes. *Cultures of Transnationality in European Migration* will be of broad interest to scholars and students of transnational migration, European development, cultural sociology, intersectionality and subjectivity. Specifically, it will appeal to scholars interested in the cultural ramifications of moving and staying as well as those interested in the interplay of gender, ethnicity and class in the making of social inequality.
