The Way Of The Maker Eric Wesselows Life Through Art:

The Way of the Maker Eric Wesselow, 2002 The articles collected in this volume have been selected and edited by Scott Eastham from over twenty years of Eric Wesselow's lectures and writings They center on art and spirituality but also encompass linguistics philosophy communication studies and education In these essays Wesselow demonstrates an uncanny capacity for allowing the reader to witness the processes of art from the inside He lets us stand by him as he takes in hand various materials and attends carefully not only to what he can do with them but to what they do to him and what there is to learn from each Eric Wesselow shows us that the visionary dimension of art brings us not a vision of some other world but a reawakening of the artist in each of us graced with the gift of seeing this very world in all its radiance *Cirpit Review*.
Monographs n. 3 - 2016 Aa. Vv., 2016-06-21 T00:00:00+02:00 This book is a tribute to Scott Thomas Eastham from his family former students and colleagues at Massey University in Palmerston North New Zealand where he lectured in the department of English and Media Studies for 19 years American Dreamer Scott Eastham, 2007-07-26 Synergetics can be defined as the exploratory strategy of starting with the whole It was in the 1940s that Buckminster Fuller developed a series of spherical models which embodied the synergetic theory within geometry This study of Fuller's sacred geometry describes with vigour and in detail how his spherical figures relate both to Nature and to the tenets of synergetics The author assesses the legacy of Fuller a scientist artist engineer extraordinaire whose visions were inspired by the American Dream and portrays with enthusiasm and sympathy the creative and individual science of a man whose character was as multifaceted as the domes he created Discover the theory behind the idea that the straight lines and boxes of science and maths are inadequate for representing Nature's spherical and cyclical patterns of growth The ways in which Fuller's synergetics can be seen in the ancient iconographies of the past are also revealed with fresh insight In addition Eastham looks to the future artistic applications of Fuller's wholes with the aim of inspiring the reader to think outside of the box themselves We sought for years to bring out a brief alternative geometry textbook It's not easy to produce a round thing in a square world Extract from the Introduction Education as Gift Damian Ruth, 2024-04-22 Education is about human flourishing and explores meaning purpose and values As a holistic and integral practice for developing sustained attention and concentration education is profoundly antithetical to the market and it is not a technological domain The combination of markets and technology in the pursuit of efficiency destroys the potential of education to help societies nurture well being This book dives deeply into the overlapping crises of education today The author draws on decades of experience and many disciplines to celebrate the spirit of education and to frame it as a gift **Subject Guide to Books in Print**, 2001 *Books In Print*
