Trends and Challenges in Science and Higher Education Hugo Horta, Manuel Heitor, Jamil Salmi, 2015-12-01 This book discusses the role that integrated science and higher education policies may play in further democratizing and promoting social economic development in Latin America It suggests that such democratizing and development may be achieved in two complementary ways i broadening the access to knowledge through formal learning processes of higher education and ii promoting the advanced qualification of people while strengthening research institutions The book shows how this entails a complex process of policy integration with an emphasis on human resources and institutional issues combined in processes of technical change It discusses in detail the three main challenges that most Latin American countries face in a globalized age based on knowledge and ever evolving learning processes These challenges are the need to broaden the access to higher education to make this access more socially balanced and to recover from a long gap in investing in knowledge production and dissemination This book treats these issues from a variety of conceptual and methodological perspectives that present a contribution to the field of science policy and higher education studies and inform policymakers in Latin America

Academic Work and Careers in Europe: Trends, Challenges, Perspectives Tatiana Fumasoli, Gaële Goastellec, Barbara M. Kehm, 2014-10-29 This book explores the perceptions of academic staff and representatives of institutional leadership about the changes in academic careers and academic work experienced in recent years It emphasizes standardisation and differentiation of academic career paths impacts of new forms of quality management on academic work changes in recruitment employment and working conditions and academics perceptions of their professional contexts The book demonstrates a growing diversity within the academic profession and new professional roles inhabiting a space which is neither located in the core business of teaching and research nor at the top level management and leadership The new higher education professionals tend to be important change agents within the higher education institutions not only fulfilling service and bridging functions but also streamlining academic work to make a contribution to the reputation and competitiveness of the institution as a whole Based on interviews with academic staff this book explores the situation in eight European countries Austria Croatia Finland Germany Ireland Poland Romania and Switzerland **The Forefront of**

International Higher Education Alma Maldonado-Maldonado, Roberta Malee Bassett, 2013-10-07 This book honors the academic trajectory and global impact of Philip G Altbach one of the most important education comparativists worldwide for over forty years From his early writings on India and student activism to his recent work on research universities Altbach has served as a key developer of the expansion of the field to include comparative higher education His capacity to find support and gather the best minds around the world to organize research teams in order to explore the most relevant issues on comparative higher education has earned him international recognition His service to the field of comparative higher education is invaluable and incomparable This festschrift contains original pieces from colleagues and former students

following a twofold discussion the most relevant topics on comparative higher education and particular Altbach's contributions to this field of work *How College Students Succeed* Nicholas A. Bowman, 2023-07-03 Receiving a college education has perhaps never been more important than it is today While its personal societal and overall economic benefits are well documented too many college students fail to complete their postsecondary education As colleges and universities are investing substantial resources into efforts to counter these attrition rates and increase retention they are mostly unaware of the robust literature on student success that is often bounded in disciplinary silos The purpose of this book is to bring together in a single volume the extensive knowledge on college student success It includes seven chapters from authors who each synthesize the literature from their own field of study or perspective Each describes the theories models and concepts they use summarizes the key findings from their research and provides implications for practice policy and or research The disciplinary chapters offer perspectives from higher education public policy behavioral economics social psychology STEM sociology and critical and post structural theory **Higher Education and Research for the ERA** European Commission.
