

This is a study guide for the Math 32 final, Fall 2013. It is not intended to be exhaustive. The best way to study is to do practice solving problems so I suggest you do as many problems as you can, not just the ones listed here. I would recommend doing the problems in the chapter review sections. The study guide ONLY covers trig, so you will need to review chapters 0-3, sec 7.1-7.2, and Appendix A as well. Good luck!

Section 4.1-4.2

The unit circle: positive angles are measured counter-clockwise, negative angles are measured clockwise. We usually call an angle θ (the Greek letter "theta"), but it can have any name.

$180^\circ = \pi$ radians.

To convert from radians to degrees, multiply by $\frac{180}{\pi}$.

To convert from degrees to radians, multiply by $\frac{\pi}{180}$.

Trigonometry Study Guide Review
