The extensive and increasing use of embedded systems and their integration in everyday products marks a significant  
evolution in information science and technology We expect that within a short timeframe embedded systems will be a part of  
nearly all equipment designed or manufactured in Europe the USA and Asia There is now a strategic shift in emphasis for  
embedded systems designers from simply achieving feasibility to achieving optimality Optimal design of embedded systems  
means targeting a given market segment at the lowest cost and delivery time possible Optimality implies seamless  
integration with the physical and electronic environment while respecting real world constraints such as hard deadlines  
reliability availability robustness power consumption and cost In our view optimality can only be achieved through the  
emergence of embedded systems as a discipline in its own right      **Interface** ,1987      *Treasury, Postal Service, and*
