Gower Handbook of People in

Project Management Lindsay Scott, 2016-04-22 Modern projects are all about one group of people delivering benefits to others so it is no surprise that the human element is fundamental to project management. The Gower Handbook of People in Project Management is a complete guide to the human dimensions involved in projects. The book is a unique and rich compilation of over 60 chapters about project management roles and the people who sponsor, manage, deliver work in or are otherwise important to project success. It looks at the people issues that are specific to different sectors of organization: public, private and third sector; the organization of people in projects both real and virtual; the relationship between people, their roles and the project environment; and the human behaviours and skills associated with working collaboratively. Thus this comprehensive and innovative handbook discusses all the important topics associated with employing, developing and managing people for successful projects. The contributors have been drawn from around the world and include experts ranging from practising managers to academics and advanced researchers. The Handbook is divided into six parts which begin with management and project organization and progress through to more advanced and emerging practices. It benefits hugely from Lindsay Scott's expert knowledge and experience in this field and from Dennis Lock's contributions and meticulous editing to ensure that the text and illustrations are always lucid and informative. **Introduction to Forensic**

Psychology Curt R. Bartol, Anne M. Bartol, 2025-01-09 Written by authors with extensive experience in both the field and classroom, *Introduction to Forensic Psychology: Research and Application*, Seventh Edition, equips students with the skills to analyze psychological knowledge and research findings, applying them effectively to both civil and criminal justice systems. The text is structured to cover five vital areas: law enforcement and investigative psychology, legal psychology, criminal psychology, victimology and victim services, and correctional psychology, while also addressing emerging technologies such as facial recognition and artificial intelligence. Moreover, it emphasizes an essential multicultural perspective, underscoring the need for sensitivity to ethnic, gender, cultural and racial dynamics, preparing students to navigate the diverse challenges they will encounter in their professional careers.
