The Three Pillars Of Sustainable National Security In A Transnational World:

The Three Pillars of Sustainable National Security in a Transnational World Nayef R.F. Al-Rodhan, 2008 **Sustainable History and Human Dignity** Nayef R.F. Al-Rodhan, 2022-01-01 In *Sustainable History and Human Dignity* Professor Nayef Al Rodhan shows that it is the human quest for sustainable governance balancing the ever present tension between nine human dignity needs and three human nature attributes emotionality amorality egoism that has and will most profoundly shape the course of history Beginning with an Ocean Model of a single collective human civilisation Al Rodhan constructs a common human story comprised of multiple geo cultural domains and sub cultures with a history of mutual borrowing and synergies If humanity as a whole is to flourish all of these diverse geo cultural domains must succeed Only thus can lasting peace and prosperity be achieved for all especially in the face of Civilisational Frontier Risks and highly disruptive technologies in the twenty first century **21st-Century Statecraft** Nayef Al-Rodhan, 2022-07-28 From civilisational frontier risks associated with new challenges like disruptive technologies to the shifting nature of great power conflicts and subversion the 21st century requires a new approach to statecraft In *21st Century Statecraft* Professor Nayef Al Rodhan proposes five innovative statecraft concepts He makes the case for a new method of geopolitical analysis called meta geopolitics and for dignity based governance He shows how in an interdependent and interconnected world traditional thinking must move beyond zero sum games and focus on multi sum and symbiotic realist interstate relations This requires a new paradigm of global security premised on five dimensions of security and a new concept of power just power which highlights the centrality of justice to state interests These concepts enable states to balance competing interests and work towards what the author calls reconciliation statecraft Throughout Professor Al Rodhan brings his philosophical and neuroscientific expertise to bear providing a practical model for conducting statecraft in a sustainable way

Meta-Geopolitics of Outer Space N. Al-Rodhan, 2012-05-11 Al Rodhan sheds new light on the debate about the geopolitics of outer space going beyond applying traditional International Relations approaches to space power and security by introducing a multidimensional spatial framework The meta geopolitics framework includes space and expands classical power considerations to cover seven state capacities Potential Global Strategic Catastrophes Nayef R. F. Al-Rodhan, 2009 This book is the result of a Symposium on Potential Global Strategic Catastrophes which took place in Geneva Switzerland in 2008 The catastrophes chosen do not include remote and less immediate events Only those with the potential to produce multiple cascading strategic dilemmas for states and the international system were selected These dilemmas include balancing the sovereign rights of states with human rights transnational responsibilities and burden sharing under occasional geopolitical uncertainties The book deals with the theoretical foundations of coping with catastrophes and the relevant interstate and organisational paradigms Other sections address specific catastrophes and their potential consequences pandemics water crises global warming nanosecurity nuclear catastrophes financial meltdown cyber crises demographic imbalances and

forced migrations state failure and war massive conventional terrorist attacks and threats to energy supply Dr Nayef R F Al Rodhan is Senior Scholar in Geostrategy and Director of the Programme on the Geopolitical Implications of Globalisation and Transnational Security at the Geneva Centre for Security Policy Geneva Switzerland The tremendous power of globalisation unleashed some two decades ago demonstrates in fact how fragile the planet is Never in history has man faced simultaneously seemingly unlimited opportunities and equally unlimited daunting threats and challenges Potential Global Strategic Catastrophes is a remarkable publication based on the collective thoughts of some of the world's leading thinkers covering a broad spectrum of reality the catastrophes that might ensue and the strategic implications It is an excellent map for the 21st century Jean Pierre Lehmann Professor of International Political Economy IMD and Founding Director of The Evian Group Lausanne Switzerland *Human Trafficking in Africa* Alecia Dionne Hoffman, Sabella Ogbobode

in international law and explores many legal issues raised in its wake. It sketches a theory of the ICP and encourages engagement with its amorphous legal nature through reimagining of international law beyond the State in service to humanity. The book offers two primary contributions: one descriptive and one normative. The descriptive section of the book sketches a history of the emergence of the ICP and discusses existing analogical approaches to theorizing the corporation in international law. It then turns to an analysis of the primary judicial decisions and international legal instruments that animate internationally a concept that began in U.S. domestic law. The descriptive section concludes with a list of twenty-two judge-made and text-made rights and privileges presently available to the ICP that are not available to other international legal personalities; these are later categorized into active and passive rights. The normative section of the book begins the shift from what is to what ought to be by sketching a theory of the ICP that, unlike existing attempts to place the corporation in international legal theory, does not rely on analogical reasoning. Rather, it adopts the Jessupian emphasis on human problems and encourages pragmatic, solution-oriented legal analysis and interpretation, especially in arbitral tribunals and international courts where legal reasoning is frequently borrowed from domestic law and international treaty regimes. It suggests that ICPs should have passive or procedural rights that cater to problems that can be characterized as universal, but that international law should avoid universalizing active or substantive rights which ICPs can shape through agency. The book concludes by identifying new trajectories in law relevant to the future and evolution of the ICP. This book will be most useful to students and practitioners of international law but provides riveting material for anyone interested in understanding the phenomenon of international corporate personhood or the international law surrounding corporations more generally.
