## **The Trouble With Unity The Trouble With Unity:**

*Duns Scotus and the Problem of Universals* Todd Bates, 2010-08-26 John Duns Scotus d 1308 known as the subtle doctor among medieval schoolmen produced a formidable philosophical theology using and adapting an Aristotelian metaphysical framework Critical of Thomas Aquinas grand Summas Scotus died before producing a final synthesis of his own Indeed his work left in disarray for centuries has only recently become available in an edited format Contemporary metaphysics taking up the problem of universals treads on ground already well worked by Scotus Duns Scotus and the Problem of Universals shows how Scotus treatment of the problem of universals is both coherent and even by contemporary standards cogent Todd Bates recovers and sets out Scotus understanding of the structure of material substance reconstructs Scotus arguments for universals and haecceities and shows how Scotus theory applies to the metaphysics of the Incarnation This book makes an important contribution to a neglected but crucial area of Scotus scholarship

**The Beauty of a Social Problem** Walter Benn Michaels, 2015-07-13 Bertolt Brecht once worried that how we feel about the victims of a social problem can get in the way of the beauty and attraction of the problem itself In this book Walter Benn Michaels explores the same dilemma through a study of several contemporary artist photographers whose work speaks to questions of political economy Michaels focuses on the work of several artists mostly born in the 1970s and thus raised in a world where artistic ambition has been identified with a critique of autonomous form and of meaning as a function of intention Michaels shows that these artists engage but also push beyond this critique of autonomy and intentionality producing works that embody a new commitment to form and meaning The explanation for this commitment he argues is these artists consciousness of making art in an economy riven by structural conflict especially an unprecedented rise in inequality For them he argues the relationship of the art work to the world to its subject and to its beholder functions as an emblem of the relation between classes rather than identities or subject positions This book will join the short shelf of essential writings about the medium of photography

*The Oxford Companion to Consciousness* Tim Bayne, Axel Cleeremans, Patrick Wilken, 2009-06-04 Consciousness is undoubtedly one of the last remaining scientific mysteries and hence one of the greatest contemporary scientific challenges How does the brain's activity result in the rich phenomenology that characterizes our waking life Are animals conscious Why did consciousness evolve How does science proceed to answer such questions Can we define what consciousness is Can we measure it Can we use experimental results to further our understanding of disorders of consciousness such as those seen in schizophrenia delirium or altered states of consciousness These questions are at the heart of contemporary research in the domain Answering them requires a fundamentally interdisciplinary approach that engages not only philosophers but also neuroscientists and psychologists in a joint effort to develop novel approaches that reflect both the stunning recent advances in imaging methods as well as the continuing refinement of our concepts of consciousness In this light the Oxford Companion to Consciousness is the most complete authoritative survey of contemporary research on consciousness Five years in the making and including

over 250 concise entries written by leaders in the field the volume covers both fundamental knowledge as well as more recent advances in this rapidly changing domain Structured as an easy to use dictionary and extensively cross referenced the Companion offers contributions from philosophy of mind to neuroscience from experimental psychology to clinical findings so reflecting the profoundly interdisciplinary nature of the domain Particular care has been taken to ensure that each of the entries is accessible to the general reader and that the overall volume represents a comprehensive snapshot of the contemporary study of consciousness The result is a unique compendium that will prove indispensable to anyone interested in consciousness from beginning students wishing to clarify a concept to professional consciousness researchers looking for the best characterization of a particular phenomenon

*The Problem of Universals in Contemporary Philosophy* Gabriele Galluzzo, Michael J. Loux, 2015-07-16 Are there any universal entities Or is the world populated only by particular things The problem of universals is one of the most fascinating and enduring topics in the history of metaphysics with roots in ancient and medieval philosophy This collection of new essays provides an innovative overview of the contemporary debate on universals Rather than focusing exclusively on the traditional opposition between realism and nominalism the contributors explore the complexity of the debate and illustrate a broad range of positions within both the realist and the nominalist camps Realism is viewed through the lens of the distinction between constituent and relational ontologies while nominalism is reconstructed in light of the controversy over the notion of trope The result is a fresh picture of contemporary metaphysics in which traditional strategies of dealing with the problem of universals are both reaffirmed and called into question

The Blackwell Companion to Substance Dualism Jonathan J. Loose, Angus J. L. Menuge, J. P. Moreland, 2018-03-13 THE BLACKWELL COMPANION TO SUBSTANCE DUALISM This is a terrific volume by a long way the best currently available anthology on dualism and a worthy addition to Blackwell's distinguished series of Companions Tim Crane Central European University A major contribution to an ongoing transformation of analytic philosophy of mind Howard Robinson Central European University This high quality volume offers a rich variety of perspectives on substance dualism and will be a valuable resource for students and researchers in philosophy of mind and philosophy of religion John Cottingham University of Reading Thorough and fair the quality of the essays is high This will certainly be the book on substance dualism Michael Tye University of Texas at Austin Substance dualism has for some time been dismissed as an archaic and defeated position in philosophy of mind but in recent years the topic has experienced a resurgence of scholarly interest and has been restored to contemporary prominence by a growing minority of philosophers prepared to interrogate the core principles upon which past objections and misunderstandings rest As the first book of its kind to bring together a collection of contemporary writing from top proponents and critics in a pro contra format the Blackwell Companion to Substance Dualism captures this ongoing dialogue and sets the stage for rigorous and lively discourse around dualist and physicalist accounts of human persons in philosophy Chapters explore emergent Thomistic Cartesian and other forms of substance dualism broadly conceived in

dialogue with leading varieties of physicalism including animalism non reductive physicalism and constitution theory Loose Menuge and Moreland pair essays from dualist advocates with astute criticism from physicalist opponents and vice versa highlighting points of contrast for readers in thematic sections while showcasing today's leading minds engaged in direct debate Taken together essays provide nuanced paths of introduction for students and capture the imagination of professional philosophers looking to expand their understanding of the subject Skillfully curated and in touch with contemporary science as well as analytic theology the Blackwell Companion to Substance Dualism strikes a measured balanced between advocacy and criticism and is a first rate resource for researchers scholars and students of philosophy theology and neuroscience

Wood, Anna Rose, 2019-02-12 Now in its fifth edition this leading reader has been updated with new readings and visual sources This edition includes an added final chapter on current social movements to help students reflect on the ecological realities that inform their world In addition the Legacies of Colonialism chapter has been restored to give students an understanding of the deep roots of the problems explored Instead of a separate chapter on women and social change women's voices have been woven more seamlessly throughout the book to reflect women's parity and equity in history With its innovative combination of primary and secondary sources and thoughtful editorial analysis this text is designed specifically to stimulate critical thinking in a wide range of courses on Latin American history since independence

Deleuze and the Problem of Experience Dror Yinon, 2025-07-24 This comprehensive reframing of Gilles Deleuze as a transcendental empiricist delves into his seminal Difference and Repetition to unearth a system that inverts the Kantian worldview By focusing on Deleuze's theory of the faculties we can see how he builds a transcendental system of thought that defies the predictability of empirical experience The place of experience in the way we understand our relation to the world to others and to ourselves is a central theme of modern philosophy Deleuze's transcendental empiricism points to an unexplored direction in this major philosophical preoccupation It is a road not taken that against the tide of his times rejected the possibility of an immediate contact with being and embraced the possibility of reaching a real that lay beneath many layers of mediation Unlike many of his contemporaries Deleuze neither subscribed to a specific philosophical school nor did he try to establish one This new understanding of him as a transcendental empiricist not only helps to situate his work in the constellation of twentieth century French philosophers but also helps us to understand a philosopher for whom difference and heterogeneity were central to his own philosophical corpus

**Fundamental Problems of Life** John Stuart Mackenzie, 1928

*Fault Lines of Globalization* Hans Lindahl, 2013-09-26 The question whether and how boundaries might individuate and thereby be constitutive features of any imaginable legal order has yet to be addressed in a systematic and comprehensive manner by legal and political theory This book seeks to address this important omission providing an original contribution to the debate about law in a global setting Against the widely endorsed assumption that we are now moving towards law without boundaries it argues that every imaginable legal order global or otherwise is bounded in space time membership and content The book is built up around three main insights Firstly that legal orders can best be understood as a form of joint action in which authorities mediate and uphold who ought to do what where and when with a view to realising the normative point of acting together Secondly that behaviour can call into question the boundaries that determine who ought to do what where and when a legality Thirdly that this a legality reveals boundaries as marking a limit and to a lesser or greater extent a fault line of the respective legal order Legal boundaries reveal ways of ordering the who what where and when of behaviour which have been excluded yet which remain within the range of practical possibilities

accessible to the collective limits However legal boundaries also intimate an order which exceeds the range of possibilities accessible to that collective the fault line of the respective legal order Careful analysis of a wide range of legal orders including nomadism Roman law classical international law ius gentium multinationals cyberlaw lex mercatoria the EU global regimes of human rights and space law validates this thesis What sense then can we make of the normativity of the law if there can be no inclusion without exclusion Arguing that legal and political theories misunderstand how legal boundaries do their work of including and excluding the book develops a normative theory of legal order which is alternative to both communitarianism and cosmopolitanism     Labor-management Problems of the American Merchant Marine United States. Congress. House. Committee on Merchant Marine and Fisheries,1955     **The Fourfold Difficulty of Anglicanism, Or The Church of England Tested by the Nicene Creed, in a Series of Letters** James Spencer Northcote,1846     *The United Negro: His Problems and His Progress* Irvine Garland Penn,John Wesley Edward Bowen,1902     **The Engineer** ,1999 Presents professional information designed to keep Army engineers informed of current and emerging developments within their areas of expertise for the purpose of enhancing their professional development Articles cover engineer training doctrine operations strategy equipment history and other areas of interest to the engineering community     **A Missiology of the Road** J. Kevin Livingston,2013-11-06 David Bosch 1929 1992 was one of the foremost mission theologians of the twentieth century at once a prolific scholar committed church leader and active participant in the global conciliar and evangelical mission movements Less well known is Bosch s distinctive role in the South African church s struggle against apartheid After reviewing Bosch s background and exploring key themes in his understanding of mission and evangelism Livingston explores Bosch s legacy from the perspective of the missionary nature of the church The church is God s kingdom community acting as a witness to and instrument of the coming reign of God The church is God s alternative community simultaneously set apart from the world but also for the sake of the world exemplifying the radical implications of Christ s new community The church is God s reconciled and reconciling community serving as a sign and embodiment of God s love in Christ For those acquainted with Bosch only as the author of his magisterial *Transforming Mission* Livingston shows how Bosch integrated his theology and practice in a faithful contextually relevant way within South Africa and the global church     *Experience and the World's Own Language* Richard Gaskin,2006-02-09 Gaskin argues that John McDowell s attempt to revive the doctrine of empiricism in a minimal or transcendental form is seriously undermined by inadequacies in the way he conceives what he styles the order of justification connecting world experience and judgement     The Problems of Peace Geneva Institute of International Relations,1927     Irish Quaker Hybrid Identities Maria Kennedy,2019-09-02 Dr Kennedy s work is a sociological study of Quakers that investigates the impact that sectarianism has had on identity construction within the Religious Society of Friends in Ireland The research highlights individual Friends complex and hybrid cultural national and theological identities mirrored by the Society s corporate identity This monograph focuses specifically on examples of

political and theological hybridity These hybrid identities resulted in tensions which impact on relationships between Friends and the wider organisation How Friends negotiate and accommodate these diverse identities is explored It is argued that Irish Quakers prioritise relational unity and have developed a distinctive approach to complex identity management Kennedy asserts that in the two Irish states Quaker represents a meta identity that is counter cultural in its non sectarianism although this is more problematic within the organisation Furthermore by modelling an alternative non sectarian identity Quakers in Ireland contribute to building capacity for transformation from oppositional binary identities to more fluid and inclusive ones
