Valence Changes Zapotec Synchrony Typological:

Valence Changes in Zapotec Natalie Operstein, Aaron Huey Sonnenschein, 2015-12-15 Zapotec languages present a wide range of lexical morphological phonological and syntactic means of indicating valence changes Despite their significant theoretical interest detailed descriptions of valence changing phenomena in Zapotec are rare comparative studies are practically non existent and Zapotec contributions to the general typology of valence changing phenomena still remain largely untapped The present volume addresses this imbalance by being the first to explore Zapotec valence changing constructions in depth and to highlight their broad comparative typological and theoretical significance This book contains both write ups of contributions to the Special Session on Valence Changing Devices in Zapotecan annual meeting of SSILA 2012 and specially commissioned chapters It will be of interest to Zapotecanists Otomanguenists Mesoamericanists typologists morphologists syntacticians semanticists and general linguists with an interest in valence changing phenomena and may also be used as supplementary reading in field methods and typology courses *Language Contact and Change in Mesoamerica and Beyond* Karen Dakin, Claudia Parodi, Natalie Operstein, 2017-06-30 Language contact phenomena in Mesoamerica and adjacent regions present an exciting field for research that has the potential to significantly contribute to our understanding of language contact and the role that it plays in language change This volume presents and analyzes fresh empirical data from living and or extinct Mesoamerican languages from the Mayan Uto Aztecan Totonac Tepehuan and Otomanguen groups neighboring non Mesoamerican languages Apachean Arawakan Andean languages as well as Spanish Language contact effects in these diverse languages and language groups are typically analyzed by different subfields of linguistics that do not necessarily interact with one another It is hoped that this volume which contains works from different scholarly traditions that represent a variety of approaches to the study of language contact will contribute to the lessening of this compartmentalization The volume is relevant to researchers of language contact and contact induced change and to anyone interested both in the historical development and present features of indigenous languages of the Americas and Latin American Spanish **Voice syncretism** Nicklas N. Bahrt, 2021 This book provides a comprehensive typological account of voice syncretism focusing on resemblance in formal verbal marking between two or more of the following seven voices passives antipassives reflexives reciprocals anticausatives causatives and applicatives It covers voice syncretism from both synchronic and diachronic perspectives and has been structured in a manner that facilitates convenient access to information about specific patterns of voice syncretism their distribution and development The book is based on a survey of voice syncretism in 222 geographically and genealogically diverse languages but also thoroughly revisits previous research on the phenomenon Voice syncretism is approached systematically by establishing and exploring patterns of voice syncretism that can logically be posited for the seven voices of focus in the book 21 simplex patterns when one considers two of the seven voices sharing the same marking e g reflexive reciprocal syncretism and 99 complex patterns when one considers more than

two of the voices sharing the same marking e.g. reflexive reciprocal anticausative syncretism. In a similar vein, 42 paths of development can logically be posited if it is assumed that voice marking in each of the seven voices can potentially develop one of the other six voice functions e.g. reflexive voice marking developing a reciprocal function. This approach enables the discussion of both voice syncretism that has received considerable attention in the literature (notably middle syncretism involving the reflexive reciprocal anticausative and/or passive voices) and voice syncretism that has received little or not treatment in the past including seemingly contradictory patterns such as causative anticausative and passive antipassive syncretism. In the survey, almost all simplex patterns are attested in addition to seventeen complex patterns. In terms of diachrony, evidence is presented and discussed for twenty paths of development. The book strives to highlight the variation found in voice syncretism across the world's languages and encourage further research into the phenomenon.

Linguistic Categories, Language Description and Linguistic Typology Luca Alfieri, Giorgio Francesco Arcodia, Paolo Ramat, 2021-07-15

Few issues in the history of the language sciences have been an object of as much discussion and controversy as linguistic categories. The eleven articles included in this volume tackle the issue of categories from a wide range of perspectives and with different foci in the context of the current debate on the nature and methodology of the research on comparative concepts, particularly the relation between the categories needed to describe languages and those needed to compare languages. While the first six papers deal with general theoretical questions, the following five confront specific issues in the domain of language analysis arising from the application of categories. The volume will appeal to a very broad readership: advanced students and scholars in any field of linguistics but also specialists in the philosophy of language and scholars interested in the cognitive aspects of language from different subfields: neurolinguistics, cognitive sciences, psycholinguistics, anthropology.

Saying and Doing in Zapotec Mark A. Sicoli, 2020-09-17

A multimodal ethnography of language as living process, this book demonstrates methods for the integrated analysis of talk, gesture and material culture, developing a fresh way to understand human language through a focus on jointly achieved social actions to which it is part. Based on findings from a participatory multimedia language documentation project in a highland Zapotec community of Oaxaca, Mexico, Mark A. Sicoli brings together goals of documentary linguistics and anthropological concern with the everyday means and ends of human social life with theoretical consequences for the analysis of linguistic and cultural reproduction and change. This book argues that resonances emergent in the whole of multiparticipant multimodal interaction are organizational of human social cognitive process, important for understanding both the shape linguistic utterances take in interaction, dialogic resonance and the relationships built between distinct sign modes, intermodal resonance. In this way, *Saying and Doing in Zapotec* develops a new theory characterizing the logic of resonance in human interaction as semiotic process that connects and juxtaposes interactional moves into assemblages of relations, resonances and collaborations that build an emergent lifeworld for a language.

The Routledge Handbook of North American Languages Daniel Siddiqi, Michael Barrie, Carrie Gillon, Jason

Haugen, Eric Mathieu, 2019-09-25 The Routledge Handbook of North American Languages is a one stop reference for linguists on those topics that come up the most frequently in the study of the languages of North America including Mexico This handbook compiles a list of contributors from across many different theories and at different stages of their careers all of whom are well known experts in North American languages The volume comprises two distinct parts the first surveys some of the phenomena most frequently discussed in the study of North American languages and the second surveys some of the most frequently discussed language families of North America The consistent goal of each contribution is to couch the content of the chapter in contemporary theory so that the information is maximally relevant and accessible for a wide range of audiences including graduate students and young new scholars and even senior scholars who are looking for a crash course in the topics Empirically driven chapters provide fundamental knowledge needed to participate in contemporary theoretical discussions of these languages making this handbook an indispensable resource for linguistics scholars

Language Documentation and Revitalization in Latin American Contexts Gabriela Pérez Báez, Chris Rogers, Jorge Emilio Rosés Labrada, 2016-07-11 Up to now the focus in the field of language documentation has been predominantly on North American and Australian languages However the greatest genetic diversity in languages is found in Latin America home to over 100 distinct language families This book gives the Latin American context the attention it requires by consolidating the work of field researchers experienced in the region into one volume for the first time *Information structure in Isthmus Zapotec narrative and conversation* Juan José Bueno Holle, 2019 This book presents an in depth description of information structure in Isthmus Zapotec an Otomanguean language spoken by around 50 000 people in southeastern Oaxaca Mexico and represents the first book length treatment of information structure in a Mesoamerican language Three main observations motivate the study Strong documentation and a relatively large and active speaker community create a unique opportunity to document information structure in Isthmus Zapotec and to study the language as it is used by speakers in everyday life As a tonal and verb initial language the examination of Isthmus Zapotec represents a chance to explore the possible combinations of tone intonation morphology and verb initial syntax that may occur in the coding of information structure and The close analysis of spontaneous speech in an endangered language contributes to our theoretical understanding of information structure and informs our knowledge of language documentation practices and revitalization efforts Overall the analysis presented here demonstrates the value and need for information structure studies to document and analyze naturally occurring data **Reshaping the World** Ana Díaz, 2020-04-01 Reshaping the World is a nuanced exploration of the plurality complexity and adaptability of Precolumbian and colonial era Mesoamerican cosmological models and the ways in which anthropologists and historians have used colonial and indigenous texts to understand these models in the past Since the early twentieth century it has been popularly accepted that the Precolumbian Mesoamerican cosmological model comprised nine fixed layers of underworld and thirteen fixed layers of heavens This

layered model which bears a close structural resemblance to a number of Eurasian cosmological models derived in large part from scholars reliance on colonial texts such as the post Spanish Conquest Codex Vaticanus A and Florentine Codex By reanalyzing and recontextualizing both indigenous and colonial texts and imagery in nine case studies examining Maya Zapotec Nahua and Huichol cultures the contributors discuss and challenge the commonly accepted notion that the cosmos was a static structure of superimposed levels unrelated to and unaffected by historical events and human actions Instead Mesoamerican cosmology consisted of a multitude of cosmographic repertoires that operated simultaneously as a result of historical circumstances and regional variations These spaces were and are dynamic elements shaped defined and redefined throughout the course of human history Indigenous cosmographies could be subdivided and organized in complex and diverse arrangements as components in a dynamic interplay which cannot be adequately understood if the cosmological discourse is reduced to a superposition of nine and thirteen levels Unlike previous studies which focus on the reconstruction of a pan Mesoamerican cosmological model Reshaping the World shows how the movement of people ideas and objects in New Spain and neighboring regions produced a deep reconfiguration of Prehispanic cosmological and social structures enriching them with new conceptions of space and time The volume exposes the reciprocal influences of Mesoamerican and European theologies during the colonial era offering expansive new ways of understanding Mesoamerican models of the cosmos Contributors Sergio Botta Ana D az Kerry Hull Katarzyna Mikulska Johannes Neurath Jesper Nielsen Toke Sellner Reunert David Tav rez Alexander Tokovinine Gabrielle Vail *Biculturalism and Spanish in Contact* Eva Núñez Méndez, 2018-09-07 Biculturalism and Spanish in Contact Sociolinguistic Case Studies provides an original and modern analysis of the field of language change and variation with a specific focus on Spanish as a language in contact This edited collection focuses on diachronic variationist approaches to the Spanish language in contact with other languages from a historical sociolinguistics perspective Topics covered include language planning and policies education biculturalism linguistic variation issues in the Spanish of the southwestern United States and other socio historical and anthropological aspects of the contact situation **Grammatical Voice** Fernando Zúñiga, Seppo Kittilä, 2019-03-14 The first ever textbook devoted to the cross linguistic study of voice covering various topics and discussing data from numerous languages **La Interfaz Sintaxis-Pragmática** Valeria A. Belloro, 2019-10-08 A pesar de la relevancia que ha cobrado durante los últimos años el estudio de la estructura informativa hay a la fecha relativamente pocos volúmenes dedicados al tema disponibles para el público de lengua española En particular existe un nicho no explotado de estudios escritos en español sobre el español pero que examinen también lenguas minoritarias Con este volumen colectivo se pretende i acercar el estudio de la interfaz sintaxis pragmática desde perspectivas tipológicas al público de habla española ii dar nfasis a enfoques de corte funcionalista basados en la descripción de discurso natural e independientes de las categorías y formalizaciones de modelos gramaticales particulares iii extender el estudio de la interfaz sintaxis pragmática más allá de la articulación oracional en t pico foco para

incluir estudios ligados a la continuidad t pica al modelo de la Estructura Argumental Preferida y otros iii reunir investigaciones originales sobre interfaz sintaxis pragm tica consolidando los estudios que desde esta rea se dedican al espa ol pero tambi n apoyando el desarrollo de aquellos ligados a lenguas minoritarias de Am rica *Linguistics and Language Behavior Abstracts* ,2008-02
