There are a number of other factors that may influence the results of the study. For example, the study was conducted in a single center, which may limit the generalizability of the findings. Additionally, the study was a cross-sectional study, which may limit the ability to establish causality. Finally, the study did not control for potential confounding factors, such as age, sex, and education level.

Important Notice The digital edition of this book is missing some of the images or content found in the physical edition The

gold standard for midwives and students is back with Varney's Midwifery Fifth Edition. New to this edition are chapters describing the profession of midwifery, reproductive physiology, clinical genetics, and support for women in labor. Interwoven throughout is information on primary care, gynecology, maternity care, and neonatal care. With chapters written by a variety of expert midwives and an increased emphasis on reproductive anatomy and physiology, this new edition assists students and clinicians in understanding not only what to do but why. Updated to reflect evidence-based care, this edition also discusses the pathophysiology of various conditions in the context of normal changes in the reproductive cycle. Also included are numerous new anatomical and clinical illustrations. *American Book Publishing Record Cumulative 1998* R R Bowker
