Winning Reflections On An American Obsession:

Winning Francesco G. Duina, 2010 **Winning** Francesco Duina, 2010-08-16 Why winning doesn't always lead to happiness Most of us are taught from a young age to be winners and avoid being losers But what does it mean to win or lose And why do we care so much Does winning make us happy Winning undertakes an unprecedented investigation of winning and losing in American society what we are really after as we struggle to win our collective beliefs about winners and losers and much more Francesco Duina argues that victory and loss are not endpoints or final destinations but gateways to something of immense importance to us the affirmation of our place in the world But Duina also shows that competition is unlikely to provide us with the answers we need Winning and losing are artificial and logically flawed concepts that put us at odds with the world around us and ultimately ourselves Duina explores the social and psychological effects of the language of competition in American culture Primarily concerned with our shared obsessions about winning and losing Winning proposes a new mind set for how we can pursue our dreams and in a more satisfying way find our proper place in the world

Winners and Losers Diana C. Mutz, 2021-07-27 From acclaimed political scientist Diana Mutz a revealing look at why people's attitudes on trade differ from their own self interest Winners and Losers challenges conventional wisdom about how American citizens form opinions on international trade While dominant explanations in economics emphasize personal self interest and whether individuals gain or lose financially as a result of trade this book takes a psychological approach demonstrating how people view the complex world of international trade through the lens of interpersonal relations Drawing on psychological theories of preference formation as well as original surveys and experiments Diana Mutz finds that in contrast to the economic view of trade as cooperation for mutual benefit many Americans view trade as a competition between the United States and other countries a contest of us versus them These people favor trade as long as they see Americans as the winners in these interactions viewing trade as a way to establish dominance over foreign competitors For others trade is a means of maintaining more peaceful relations between countries Just as individuals may exchange gifts to cement relationships international trade is a tie that binds nations together in trust and cooperation Winners and Losers reveals how people's orientations toward in groups and out groups play a central role in influencing how they think about trade with foreign countries and shows how a better understanding of the psychological underpinnings of public opinion can lead to lasting economic and societal benefits
