The Ugly Laws Disability In Public The History Of Disability:

The Ugly Laws Susan M. Schweik, 2009 In the culture of the modern West we see ourselves as thinking subjects defined by our conscious thought autonomous and separate from each other and the world we survey Current research in neurology and cognitive science shows that this picture is false We think with our bodies and in interaction with others and our thought is never completed The Fiction of a Thinkable World is a wide ranging exploration of the meaning of this insight for our understanding of history ethics and politics Ambitious but never overwhelming carrying its immense learning lightly The Fiction of a Thinkable World shows how the Western conception of the human subject came to be formed historically how it contrasts with that of Eastern thought and how it provides the basic justification for the institutions of liberal capitalism The fiction of a world separated from each of us as we are separated from each other from which we make our choices in solitary thought is enacted by the voter in the voting booth and the consumer at the supermarket shelf The structure of daily experience in capitalist society reinforces the fictions of the Western intellectual tradition stunt human creativity and create the illusion that the capitalist order is natural and unsurpassable Steinberg's critique of the intellectual world of Western capitalism at the same time illuminates the paths that have been closed off in that world It draws on Chinese ethics to show how our actions can be brought in accord with the world as it is in its ever changing interaction and mutual transformation and sketches a radical political perspective that sheds the illusions of the Western model Beautifully conceived and written The Fiction of a Thinkable World provides new ways of thinking and opens new horizons

The Oxford Handbook of Disability History Michael Rembis, Catherine J. Kudlick, Kim Nielsen, 2018-06-19 Disability history exists outside of the institutions healers and treatments it often brings to mind It is a history where disabled people live not just as patients or cure seekers but rather as people living differently in the world and it is also a history that helps define the fundamental concepts of identity community citizenship and normality The Oxford Handbook of Disability History is the first volume of its kind to represent this history and its global scale from ancient Greece to British West Africa The twenty seven articles written by thirty experts from across the field capture the diversity and liveliness of this emerging scholarship Whether

The Idea of Disability in the Eighteenth Century Chris Mounsey, 2014-03-21 The Idea of Disability in the Eighteenth Century explores disabled people who lived in the eighteenth century The first four essays consider philosophical writing dating between 1663 and 1788 when the understanding of disability altered dramatically We begin with Margaret Cavendish whose natural philosophy rejected ideas of superiority or inferiority between individuals based upon physical or mental difference We then move to John Locke the founder of empiricism in 1680 who believed that the basis of knowledge was observability but who faced with the lack of anything to observe broke his own epistemological rules in his explanation of mental illness Understanding the problems that empiricism set up Anthony Ashley Cooper Lord Shaftesbury turned in 1711 to moral philosophy but also founded his philosophy on a flaw He believed in the harmony of the aesthetic trinity of beauty truth and virtue but he could not believe that a disabled friend whom he knew to have been moral before his physical alteration could change inside Lastly we explore Thomas Reid who in 1788 returned to the body as the ground of philosophical enquiry and saw the body as a whole complete in itself and wanting nothing be it missing a sense Reid was deaf or a physical or mental capacity At the heart of the study of any historical artifact is the question of where to look for evidence and when looking for evidence of disability we have largely to rely upon texts However texts come in many forms and the next two essays explore three types the novel the periodical and the pamphlet which pour out their ideas of disability in different ways Evidence of disabled people in the eighteenth century is sparse and the lives the more evanescent The last four essays bring to light little known disabled people or people who are little known for their disability giving various forms of biographical accounts of Susanna Harrison Sarah Scott Priscilla Poynton and Thomas Gills who are all but forgotten in the academic world as well as to public consciousness

All Our Families Jennifer Natalya Fink, 2022-03-22 A provocation to reclaim

our disability lineage in order to profoundly reimagine the possibilities for our relationship to disability kinship and carework Disability is often described as a tragedy a crisis or an aberration though 1 in 5 people worldwide have a disability Why is this common human experience rendered exceptional In *All Our Families* disability studies scholar Jennifer Natalya Fink argues that this originates in our families When we cut a disabled member out of the family story disability remains a trauma as opposed to a shared and ordinary experience This makes disability and its diagnosis traumatic and exceptional Weaving together stories of members of her own family with sociohistorical research Fink illustrates how the eradication of disabled people from family narratives is rooted in racist misogynistic and antisemitic sorting systems inherited from Nazis By examining the rhetoric of genetic testing she shows that a fear of disability begins before a child is even born and that a fear of disability is fundamentally a fear of care Fink analyzes our racist and sexist care systems exposing their inequities as a source of stigmatizing ableism Inspired by queer and critical race theory Fink calls for a lineage of disability a reclamation of disability as a history a culture and an identity Such a lineage offers a means of seeing disability in the context of a collective sense of belonging as cause for celebration and is a call for a radical reimagining of carework and kinship *All Our Families* challenges us to re lineate disability within the family as a means of repair toward a more inclusive and flexible structure of care and community
