The Educational Leader's Guide to Improvement Science Robert Crow,Brandi Nicole Hinnant-Crawford,Dean T. Spaulding,2019-05-23 The Educational Leader s Guide to Improvement Science Data Design and Cases for Reflection is a collection illustrating applied organizational problem solving using methods of improvement science in educational leadership Early chapters introduce improvement science and then the reader is led through a logical sequence of inquiry presented with cases of educational dilemma matched with principles of improvement science and provided examples of research methodology applied in context Because improvement science research is so quickly becoming a signature pedagogy and core subject area of inquiry in the field of educational leadership the literature is still scant in its coverage of improvement science models it is the purpose of this publication to fill the void by providing concrete examples through case studies of instances where improvement research methods and analyses can be embedded to enhance and strengthen efforts at organizational improvement This text concentrates on the elements faculty students and administrators need specific models where improvement science frameworks enhance the reliability and validity of

improvement or quality enhancement efforts Perfect for courses such as Introduction to Improvement Science Seminar Practicum in Educational Leadership Introduction to Program Evaluation Educational Research for Administrators Action Research for School Practitioners Educational Research School Improvement and Teacher Leadership [AccessAsia](#) ,1995

Everyday Lifestyles and Sustainability Fabricio Chicca,Brenda Vale,Robert Vale,2018-04-09 The impact of humanity on the earth overshoots the earth's bio capacity to supply humanity's needs meaning that people are living off earth's capital rather than its income However not all countries are equal and this book explores why apparently similar patterns of daily living can lead to larger and smaller environmental impacts The contributors describe daily life in many different places in the world and then calculate the environmental impact of these ways of living from the perspective of ecological and carbon footprints This leads to comparison and discussion of what living within the limits of the planet might mean Current footprints for countries are derived from national statistics and these hide the variety of impacts made by individual people and the choices they make in their daily lives This book takes a bottom up approach by calculating the footprints of daily living The purpose is to show that small changes in behaviour now could avoid some very challenging problems in the future Offering a global perspective on the question of sustainable living this book will be of great interest to anyone with a concern for the future as well as students and researchers in environmental studies human geography and development studies

Whitaker's Cumulative Book List ,1975 *Biomedical Visions* Elizabeth Hughes,Alfred Freeborn,2025-10-20 We live in an age of biomedical visions There seems to be no end to the demystification of the body through visualization technologies and the promise of health is irresistible Yet alongside these promising technologies inequalities in healthcare persist Life and illness play out in the gap between visualized bodies and ideological notions of health and disease This publication brings together perspectives from art history visual science studies science and technology studies sociology and cultural anthropology to encounter watercolours sculpture comics advertising and infographics Images are a primary way of recognizing the body but they inevitably promise too much and disappoint us in our quest for bodily self control The collection brings together epistemology medicine and art to understand what biomedicine looks like and how we might view it differently in the past and in the future *Delivering Value with BIM* Adriana Sanchez,Keith Hampson,Simon

Vaux,2016-03-31 Building Information Modelling BIM is a global phenomenon which is gaining significant momentum across the world Currently there is little information on how to realise and monitor benefits from implementing BIM across the life cycle of a built environment asset This book provides a practical and strategic framework to realise value from implementing BIM by adapting Benefit Realisation Management theory It presents an approach for practitioners aiming to implement BIM across the life cycle of built environment assets including both buildings and infrastructure Additionally the book features wide ranging information about BIM the challenges of monitoring progress towards benefit goals and the greater context of implementation a set of dictionaries that illustrate how benefits can be achieved what the benefit flows are and the enabling

tools and processes that contribute to achieving and maximising them a suite of measures that can serve to monitor progress with examples of how they have been used to measure benefits from BIM real world examples from across the world and life cycle phases that show how these benefits can be achieved and information on international maturity and competency measures to complement the value realisation framework Including a blend of academic and industry input this book has been developed in close collaborative consultation with industry government and international research organisations and could be used for industry courses on BIM benefits and implementation for asset management or by universities that teach BIM related courses
