Varieties Of Environmentalism Essays North And South:

Varieties of Environmentalism Ramachandra Guha, Joan Martínez Alier, 2013-10-11 Until very recently studies of the environmental movement have been heavily biased towards the North Atlantic worlds There was a common assumption amongst historians and sociologists that concerns over such issues as conservation or biodiversity were the exclusive preserve of the affluent westerner the ultimate luxury of the consumer society Citizens of the world's poorest countries ran the conventional wisdom had nothing to gain from environmental concerns they were too poor to be green and were attending to the more urgent business of survival Yet strong environmental movements have sprung up over recent decades in some of the poorest countries in Asia and Latin America albeit with origins and forms of expression quite distinct from their western counterparts In *Varieties of Environmentalism* Guha and Matinez Alier seek to articulate the values and orientation of the environmentalism of the poor and to explore the conflicting priorities of South and North that were so dramatically highlighted at the Rio Earth Summit in 1992 Essays on the ecology of affluence are also included placing in context such uniquely western phenomena as the cult of wilderness and the environmental justice movement Using a combination of archival and field data The book presents analyses of environmental conflicts and ideologies in four continents North and South America Asia and Europe The authors present the nature and history of environmental movements in quite a new light one which clarifies the issues and the processes behind them They also provide reappraisals for three seminal figures Gandhi Georgescu Roegen and Mumford whose legacy may yet contribute to a greater cross cultural understanding within the environmental movements *Varieties of Environmentalism* Ramachandra Guha, Joan Martínez Alier, 2000 An attempt to highlight the values and orientation of the environmentalism of the poor and explore conflicting priorities of the rich and poor nations **Varieties Of Environmentalism: Essays North And South**

Ramachandra Guha, Joan Martinez-Alier, 1997 **Politics of the Environment** Chukwumerije Okereke, 2018-12-07 The environment is increasingly seen at the forefront of many political agendas Covering important topics such as the Kyoto protocol and deforestation this book provides extensive coverage of all aspects of environmental politics Essays of around 6 000 words in length make up the bulk of the book Written by notable experts in the field of environmental politics these essays each examine a different aspect of the subject **Understanding Southern Social Movements** Simin

Fadaee, 2016-02-12 Southern social movements have played an important role in shaping world history and politics Nevertheless scholarly literature on movements of the global South remains limited and restricted to testing the social movement theory which was developed in the North This Northern centric approach largely fails to provide a meaningful understanding of Southern movements because it is not directly applicable to the differing historical backgrounds culture and socio economic structures found in the South Much of the uniqueness and complexity of Southern social movements has therefore been overlooked This collection analyses recent events and developments in Southern social movements

introducing well researched case studies from fifteen countries of the global South Arranged in two parts the volume examines firstly movements which focus on rights and quality of life issues and secondly the post 2011 wave of uprisings which started with Tunisian and Egyptian movements Contributing to ongoing discussions about the Northern centric nature of social movement theory and the social sciences more generally the authors enter into dialogue with the debate on local and national levels as well as globalizing processes Through an interdisciplinary approach this book broadens the theoretical and empirical perspectives for the study of social movements and will appeal to sociologists political scientists scholars and students of social movements and social activists

Ethics of the Global Environment Robin Attfield,2015-02-12 This fully updated and expanded textbook looks at issues including climate change sustainable development and biodiversity preservation and sensitively addresses global developments such as the Summits at Durban on climate and at Nagoya on biodiversity

Palgrave Advances in International Environmental Politics M. Betsill,K. Hochstetler,D. Stevis,2005-10-31 Palgrave Advances in International Environmental Politics provides a state of the art review of the major theoretical approaches and substantive debates of the field The first section reviews the historical development of international environmental politics as well as the theoretical and methodological approaches used in its study The following chapters each review the trajectory of a key research area within international environmental politics and elaborate on current approaches and debates Case studies in each chapter illuminate the main theoretical questions that emerge from the review

The Political Ecology of Informal Waste Recyclers in India Federico Demaria,2023-06-26 Waste is increasingly a site of social conflict The questions related to waste management are not merely technical what how where and by whom become intrinsically political questions This book is about the power relations in recycling from the viewpoint of political ecology and ecological economics Informal waste recyclers are invisible for citizens and public policy This book focuses on environmental conflicts involving them with two emblematic case studies from India Firstly ship breaking where the metabolism of a global infrastructure namely shipping shifts social and environmental costs to very localized communities in order to obtain large profits Secondly the conflict around municipal solid waste management in Delhi shows how environmental costs are shifted to urban residents and recyclers are dispossessed of their livelihood source recyclable waste The first is an example of capital accumulation by contamination while the second involves both dispossession and contamination The struggles of informal recyclers constitute an attempt to re politicize waste metabolism beyond techno managerial solutions by fostering counter hegemonic discourses and praxis The book presents a range of experiences mostly in India but with examples from all over the world to inform theory on how environments are shaped politicized and contested

Environment, Power, and Justice Graeme Wynn,Jane Carruthers,Nancy J. Jacobs,2022-07-26 Spanning the colonial postcolonial and postapartheid eras these historical and locally specific case studies analyze and engage vernacular activist and scholarly efforts to mitigate social environmental inequity This book highlights the ways poor and vulnerable

people in South Africa Lesotho and Zimbabwe have mobilized against the structural and political forces that deny them a healthy and sustainable environment Spanning the colonial postcolonial and postapartheid eras these studies engage vernacular activist and scholarly efforts to mitigate social environmental inequity Some chapters track the genealogies of contemporary activism while others introduce positions actors and thinkers not previously identified with environmental justice Addressing health economic opportunity agricultural policy and food security the chapters in this book explore a range of issues and ways of thinking about harm to people and their ecologies Because environmental justice is often understood as a contemporary phenomenon framed around North American examples these fresh case studies will enrich both southern African history and global environmental studies Environment Power and Justice expands conceptions of environmental justice and reveals discourses and dynamics that advance both scholarship and social change Contributors Christopher Konz Marc Epprecht Mary Galvin Sarah Ives Admire Mseba Muchaparara Musemwa Matthew A Schnurr Cherryl Walker

Greening Aid? Robert L. Hicks, Bradley C. Parks, J. Timmons Roberts, Michael J. Tierney, 2008-03-13 Every year billions of dollars of environmental aid flow from the rich governments of the North to the poor governments of the South Why do donors provide this aid What do they seek to achieve How effective is the aid given And does it always go to the places of greatest environmental need From the first Earth Summit in Stockholm in 1972 to the G8 Gleneagles meeting in 2005 the issue of the impact of aid on the global environment has been the subject of vigorous protest and debate How much progress has there been in improving environmental protection and clean up in the developing world What explains the patterns of environmental aid spending and distribution is it designed to address real problems achieve geopolitical or commercial gains abroad or buy political mileage at home And what are the consequences for the estimated 4 million people that die each year from air pollution unsafe drinking water and lack of sanitation All of these questions and many more are addressed in this groundbreaking text which is based on the authors work compiling the most comprehensive dataset of foreign aid ever assembled By evaluating the likely environment impact of over 400 000 development projects by more than 50 donors to over 170 recipient nations between 1970 and 2001 Greening Aid represents a unique state of the art picture of what is happening in foreign assistance and its impact on the environment Greening Aid explains major trends and shifts over the last three decades ranks donors according to their performance and offers case studies which compare and contrast donors and types of environmental aid

The Book Review, 2005 *Environmental Ethics and Philosophy* John O'Neill, R. Kerry Turner, Ian Bateman, 2001 Sustainability and sustainable development have become key phrases of the politics of the environment They are at the centre of much environmental discourse and indeed of the series of which this collection is a part This major volume brings together a number of recent papers that address the ethical and political assumptions that underlie different uses of those concepts Part I examines equality and justice Part II focuses on justice equality and future generations Part III deals with the moral considerability of the non human world and Part IV looks at environmental justice

Part V examines economic valuation and Part VI discusses sustainability Part VII covers sustainability and nature This volume will be an invaluable source of reference for scholars of environmental economics environmental political theory environmental ethics and geography and all those concerned with the philosophical foundations of sustainability
