Canada and the End of Empire Phillip Alfred Buckner, 2007-10-01 Sir John Seeley once wrote that the British Empire was acquired in a fit of absence of mind Whatever the truth of this comment it is certainly arguable that the Empire was dismantled in such a fit This collection deals with a neglected subject in post Confederation Canadian history the implications to Canada and Canadians of British decolonization and the end of empire Canada and the End of Empire looks at Canadian diplomatic relations with the United Kingdom and the United States the Suez crisis the changing economic relationship with Great Britain in the 1950s and 1960s the role of educational and cultural institutions in maintaining the British connection the royal tour of 1959 the decision to adopt a new flag in 1964 the efforts to find a formula for repatriating the constitution the Canadianization of the Royal Canadian Navy and the attitude of First Nations to the changed nature of the Anglo Canadian relationship Historians in Commonwealth countries tend to view the end of British rule from a nationalist perspective Canada and the End of Empire challenges this view and demonstrates the centrality of imperial history in Canadian historiography An important addition to the growing canon of empire studies and imperial history this book will be of interest to historians of the Commonwealth and to scholars and students interested in the relationship between colonialism and nationalism

[?], 1997 The significance in business and economic history of Japan's startling rise in international competitiveness since the mid 1950s has not only given business academics much food for thought but has also served to increase the amount of English language writing on modern Japan Many researchers have sought to dissect the economic miracle isolating key factors which range from the national character and consensus to the favourable conjunction of market forces from unique structural elements and government policy to a free ride based in American support and free trade This new book uses a comparative perspective to shed important new light on the components of the miracle By looking at the key components of international competitiveness in Japan and Britain new light is shed on the secrets of Japanese growth and refinement of allegations of British failure There are two contributions one written by a Japanese scholar the other by a British scholar on the key variables the government industry relationship management structures education and training and finance The book concludes with new case studies of automobiles and electronics The essays revise many established notions concerning the two countries Differences in education business links for example are not as pronounced as is often claimed and the performance gap in financial services is now much narrower The book will serve as a starting point for further research on the critical aspects of modern corporate behaviour and international competitiveness
