Managing eBook Metadata in Academic Libraries Donna E Frederick,2016-01-07 Managing ebook Metadata in Academic Libraries Taming the Tiger tackles the topic of ebooks in academic libraries a trend that has been welcomed by students faculty researchers and library staff However at the same time the reality of acquiring ebooks making them discoverable and managing them presents library staff with many new challenges Traditional methods of cataloging and managing library resources are no longer relevant where the purchasing of ebooks in packages and demand driven acquisitions are the predominant models for acquiring new content Most academic libraries have a complex metadata environment wherein multiple systems draw upon the same metadata for different purposes This complexity makes the need for standards based interoperable metadata more important than ever In addition to complexity the nature of the metadata environment itself typically varies slightly from library to library making it difficult to recommend a single set of practices and procedures which would be relevant to and effective in all academic libraries Considering all of these factors together it is not surprising when academic libraries find it difficult to create and manage the metadata for their ebook collections This book is written as a guide for metadata librarians other technical services librarians

and ancillary library staff who manage ebook collections to help them understand the requirements for ebook metadata in their specific library context to create a vision for ebook metadata management and to develop a plan which addresses the relevant issues in metadata management at all stages of the lifecycle of ebooks in academic libraries from selection to deselection or preservation Explores the reasons behind creating records for our resources and challenges libraries to think about what that means for their context Discusses the complex nature of academic libraries and the electronic resources they require Encourages librarians to find their own way to manage metadata

Optimizing Discovery Systems to Improve User Experience Bonnie Imler,Michelle Eichelberger,2017-05-24 Two authors with more than 40 years of combined library experience tap into their wealth of knowledge about discovery and user experience sharing proven methods for setting up promoting and teaching their own discovery systems Discovery systems are the new one stop search model for libraries but simply implementing the software doesn't ensure that it will meet your users search needs This book looks at how discovery systems are actually used by examining the findings of several user experience UX studies providing data and observations that will inform your decisions about selecting implementing and enhancing this software This book provides library practitioners who choose administer and interact with discovery systems with insight for establishing or fine tuning a discovery system You will understand how the use and effectiveness of the top discovery systems compare to more traditional databases and web resources get insight into the comparative strengths and weaknesses of the best selling discovery systems and examine the UX research findings of the authors on student response and faculty response You'll also learn about key configuration options that help or hinder search success with these systems and affect content selection linking software setup and interlibrary loan processes The book concludes with recommended best practices for promoting discovery systems including web design placement on the library's website getting coworkers on board and PR ideas
