

Outdoor Treasure Hunt

20
CLUES

I'm sort of like sneakers
for a car. I help it run
really fast and far.

Hopscotch and skating fit
me to a tee. Don't walk on
the grass. Just walk on me!

I'm not really needed
during the day. At night
I'm turned on to show
you the way.

Fill me with seed and hang
me high. I'll bring visitors
down from the sky.

Delivery services look
for me. Make sure I'm placed
where I'm easy to see.

I like things tidy and neat.
I really like it when you
wipe your feet.

Jump on me rather
than the ground.
Jump higher
than all's that
around.

Try to resist me on a hot summer day.
I'll make you cool and burn at
the same time, so come and play.

Hot dogs, hamburgers, and
more. On here you'll find
plenty of food
galore.

I nourish my body by
eating grass. I can run with
electric, but I prefer gas.

Some people think I look a little
weird. With my pointy hat and my
long white beard.

Some people think I'm
nasty and gunk, but without me,
you'd be out of luck!

Mathematical Modeling in Ecology C. Jeffries, 2012-12-06 Mathematical ecology is the application of mathematics to describe and understand ecosystems There are two main approaches One is to describe natural communities and induce statistical patterns or relationships which should generally occur However this book is devoted entirely to introducing the student to the second approach to study deterministic mathematical models and on the basis of mathematical results on the models to look for the same patterns or relationships in nature This book is a compromise between three competing desiderata It seeks to maximize the generality of the models constrain the models to behave realistically that is to exhibit stability and other features and minimize the difficulty of presentations of the models The ultimate goal of the book is to introduce the reader to the general mathematical tools used in building realistic ecosystem models Just such a model is presented in Chapter Nine The book should also serve as a stepping stone both to advanced mathematical works like *Stability of Biological Communities* by Yu M Svirezhev and D O Logofet Mir Moscow 1983 and to advanced modeling texts like *Freshwater Ecosystems* by M Straskraba and A H Gnauch Elsevier Amsterdam 1985
