

Welcome to UWC!

Student and parent information and conditions of application

Introduction

UWC schools, colleges and programmes deliver a challenging and transformative education experience to a diverse cross section of students, inspiring them to create a more peaceful and sustainable future.

UWC has 13 schools and colleges across 5 continents all with distinctive characters but sharing the same mission, ethos and values.

Although strong academic achievement is valued highly at UWC, academic achievements are put into perspective with a demanding mix of community engagement, international affairs, physical activities and creative pursuits.

Our student intake is deliberately diverse and each of the schools and colleges draws together students from many different nations and backgrounds. Our bursaries, scholarships and fee structures aim to ensure a broad socio-economic mix within the student body that adds value to the student experience and the organisation.

UWC depends on the dedication and expertise of a network of volunteers to promote UWC and select future students. These are called national committees and they operate in more than 140 countries worldwide.

Each year a national committee will receive from the UWC schools and colleges a specific number of places (which may include a scholarship, bursary/partial scholarship or fee-paying place) for which they select students to study the International Baccalaureate (IB) Diploma.

Please make sure you find out as much as possible about UWC before going ahead with your application. It is important that you understand the aims of the organisation and the commitment involved in the programmes that are offered. For more information please go to www.uwc.org

Kennelly, 2018-12-19. This open access book provides a comprehensive examination of the European Landing Obligation policy from many relevant perspectives. It includes evaluations of its impacts at economical, socio-cultural, ecological and institutional levels. It also discusses the feasibility and benefits of several potential mitigation strategies. The book was timely published exactly at the time where the Landing Obligation was planned to be fully implemented. This book is of significant interest to all stakeholders involved but also to the general public of Europe and to other jurisdictions throughout the world that are also searching for ways to deal with bycatch and discard issues. Open Learning as a Means of Advancing Social Justice Tabisa Mayisela, Shanali Govender, 2024-01-23. This volume investigates the uptake of open learning in South African Technical Vocational Education and Training (TVET) colleges and higher education institutions. Comprised of 16 studies focused on activities at a range of colleges and universities across the country, these chapters aim to promote a better understanding of open learning practices across the Post-School Education and Training (PSET) sector, including issues such as recognition of prior learning, access for students with disabilities, work-integrated learning, professional development, novel student funding mechanisms, leadership for open educational practices, institutional culture, student support, blended and online learning, flexible learning, online assessment, open educational resource development, models and funding, and micro-credentials. This collection of peer-reviewed chapters contributes to understanding the ways in which South African PSET institutions and educators are interpreting open learning as a means of

advancing social justice It includes a historical and contemporary understanding of the economic cultural and political obstacles facing PSET drawing on Nancy Fraser s theory of social justice as participatory parity to better understand the ways in which open learning may address systemic social injustices in order to allow South African students and educators to thrive This volume emerges from research conducted by the Cases on Open Learning COOL project an initiative by the Department of Higher Education and Training in partnership with the Centre for Innovation in Learning and Teaching CILT at the University of Cape Town UCT in South Africa Religion and Education Malini Sivasubramaniam,Ruth Hayhoe,2018-01-01 Despite the increased trend towards secularisation in state schooling issues of religion and spirituality have remained important Increased pluralism within societies through expanding migration patterns is changing the religious and cultural contours of many countries in Europe and North America and is creating a need for a deeper understanding of religious diversity However the lack of religious or spiritual education within the educational curriculum leaves a moral vacuum that can become a space to be exploited by religious extremism More recently religiously motivated incidences of terrorism in several parts of the world have heightened prejudicial attitudes and distrust of certain religions in particular These are profound concerns and there is an urgency to examine how religion religious education and interfaith initiatives can address such misconceptions This book is thus timely focusing on an area that is often neglected particularly on the role of religion in education for sustainable development While religious organisations and faith communities have had a long history of involvement in both schooling and social service delivery in many countries their role in reaching development goals has not always been explicitly recognised as is evident even in the United Nations most recently conceptualised 2030 Agenda for Sustainable Development Undeniably the integration of religious dialogue into mainstream development issues is crucial because deep cleavages resulting from the issue of minority religious rights continue to give cause for concern and conflict in many countries This edited book explores some of these tensions and issues and draws parallels across differing geographical contexts to help enhance our collective and comparative understanding of the role of religious education and institutions in advancing the post 2015 development agenda The contributors to this volume each demonstrate that while religion in education can contribute to understanding and respect it is also a space that can be contested and co opted Without addressing the salience of religion however it will not be possible to foster peace and combat discrimination and prejudice This book will be of interest to researchers scholars and students in the field of comparative education and development religious studies theology and teacher development and training This book may also be of interest to national and international policy makers There are also numerous faith based organisations as well as other non governmental organisations NGOs working on religion and education issues that may find these case studies a useful resource *University on the Border* Lis Lange,Vasu Reddy,Siseko H. Kumalo,2021-08-27 The volume explores and thinks through the process of decolonising the South African higher education system by examining MustFall The text offers

theoretical insights from a historical contemporary and multidisciplinary lens while examining the embedded meanings of the university as an institution idea and set of practices to show the shifts and changes that were inaugurated by MustFall along with the historicities that define the university both locally and globally The retro and prospective insights presented in the book surface the crisis of authority that places the university in a state of precarity which is framed in the book as the border The volume proposes the concept of the border recognising its conceptual and analytical dynamism as a generative space that can facilitate new imaginaries and articulations of this social institution the university

Decolonisation after Democracy Laurence Piper, 2020-05-21 Decolonisation after Democracy addresses the provocative idea that we need to rid higher education of lingering forms of colonial knowledge This matters because in the colonial era much knowledge was put to the service of subjugating indigenous peoples and the assumptions from this era may linger into the present Examples of deep rooted and foundational forms of knowledge that carry colonial traits are normative binaries such as civilised and backward modern and traditional and rational and superstitious In addition some accounts of positive values like freedom equality justice and democracy may hide the assumption that the western experience is the norm from which other kinds are rendered imitations deviations or pathologies In this collection some of South Africa's leading political scientists and academics engage with the challenge of decolonising knowledge in the research and teaching of politics It includes new insights about the state international relations clientelism state-society relations and land reform and introduces new ways to engage the colonial library curriculum reform and the marginality of historically black institutions Finally the contributors deal with the decolonial challenge posed by the FeesMustFall student movements reflecting on issues of revolutionary politics and gender and sexual violence This book was originally published as a special issue of *Politikon*

Democracy, Diaspora, Territory Olga Oleinikova, Jumana Bayeh, 2019-10-14 This volume offers a profoundly new interpretation of the impact of modern diasporas on democracy challenging the orthodox understanding that ties these two concepts to a bounded form of territory Considering democracy and diaspora through a deterritorialised lens it takes the post Euromaidan Ukraine as a central case study to show how modern diasporas are actively involved in shaping democracy from a distance and through their political activity are becoming increasingly democratised themselves An examination of how power sharing democracies function beyond the territorial state *Democracy Diaspora Territory Europe and Cross Border Politics* compels us to reassess what we mean by democracy and diaspora today and why we need to focus on the deterritorialised dimensions of these phenomena if we are to adequately address the crises confronting numerous democracies As such it will appeal to scholars of sociology and politics with interests in migration and diaspora political theory citizenship and democracy
