Voting And Collective Decision Making Bargaining And Power:

Voting and Collective Decision-Making Annick Laruelle, Federico Valenciano, 2008-09-11 Every day thousands of decisions are made by all kinds of committees parliaments councils and boards by a yes no voting process Sometimes a committee can only accept or reject the proposals submitted to it for a decision On other occasions committee members have the possibility of modifying the proposal and bargaining an agreement prior to the vote In either case what rule should be used if each member acts on behalf of a different sized group It seems intuitively clear that if the groups are of different sizes then a symmetric rule e g the simple majority or unanimity is not suitable The question then arises of what voting rule should be used Voting and Collective Decision Making addresses this and other issues through a study of the theory of bargaining and voting power showing how it applies to real decision making contexts

Encyclopedia of Power Keith Dowding, 2011-02-01 Power is a central concept in many disciplines in the social sciences including political science, sociology, social psychology, organization studies, urban politics and planning. This encyclopedia provides a much needed authoritative and comprehensive coverage of the use of power in those different discourses, enabling the different language communities to learn from each other. It provides a compendium of the concepts that build the ways in which power is conceptualized and provides analyses of related concepts. It also provides a sourcebook for those interested in studying power and it cross-references the many insights that have been provided by theorists over the years. With comprehensive coverage of the use of power in the social sciences, the encyclopedia serves as a one-stop point of reference for the diverse and complex ways in which power has been used. It also provides a reference for debates central to the issues of power in different contexts and for related topics, showing how these disparate topics are related to power. Key Themes: Biography, Concepts Related to Power, Decisions and Game Theory, Institutional Issues, International Relations, Interpersonal Relationships, Intrapersonal Matters, Key Debates, Methodological Issues, Political Science, Political Theory, Social Psychology, Social Theory, Theories of Power, Types of Power, Urban Studies. *Consensual Processes* Enrique Herrera-Viedma, José Luis García-Lapresta, Janusz Kacprzyk, Mario Fedrizzi, Hannu Nurmi, Sławomir Zadrozny, 2011-05-13 The word consensus has been frequently used for centuries, perhaps millennia. People have always deemed it important that decisions having a long-lasting impact on groups, countries or even civilizations be arrived at in a consensual manner. Undoubtedly, the complexity of modern world in all its social, technological, economic and cultural dimensions has created new environments where consensus is regarded as desirable. Consensus typically denotes a state of agreement prevailing in a group of agents, human or software. In the strict sense of the term, consensus means that the agreement be unanimous. Since such a state is often unreachable or even unnecessary, other less demanding consensus-related notions have been introduced. These typically involve some graded, partial or imprecise concepts. The contributions to this volume define and utilize such less demanding and thus, at the same time, more general notions of consensus. However, consensus can also refer to a process whereby the state of agreement is reached. Again, this state can be something less stringent than a complete unanimity of all agents regarding all options. The process may involve modifications, resolutions and/or mitigations of the views or inputs of individuals or software agents in order to achieve the state of consensus understood in the more general sense. The consensus-reaching processes call for some soft computational approaches, methods and techniques, notably fuzzy and possibilistic ones. These are needed to accommodate the imprecision in the very meaning of some basic concepts utilized in the definition of consensus as a state of

agreement and as a process whereby this state is to be reached The overall aim of this volume is to provide a comprehensive overview and analysis of the issues related to consensus states and consensual processes
