Water Development And Poverty Reduction Natural Resource Management And Policy:

Water Development and Poverty Reduction I.H. Olcay Ünver, Rajiv K. Gupta, Aysegül Kibaroglu, 2012-12-06 In the book's four Parts the interdisciplinary approach to many issues contributes to the relationship between water and poverty. Part I includes articles on the conceptual and methodological issues concerning poverty reduction through water resources development. It also offers analysis of quantitative measurements of poverty reduction including some approaches for creating a Water Poverty Index. Part II considers the institutional frameworks for management of water and poverty reduction. Topics range from community based decision making to international leadership. Part III encompasses discussions on participatory irrigation management and the privatization of urban water supplies and sewerage and the link to poverty. Case studies from India, Turkey and Jordan make up Part IV. The studies present diverse water management and development practices for poverty reduction including realistic pricing and effective irrigation practices, the use of water as an engine for sustainable development, small and large scale strategies for reducing the risks and uncertainties in water availability and food security, the economic value of improved water supplies and the positive impact of small scale development projects.

Rural, Environment, and Social Development Strategies for the Europe and Central Asia Region, 2000-01-01 This report proposes a World Bank strategy for assisting the rural environmental and social development of Eastern Europe and Central Asia. It has been produced for a general audience partly for consultation purposes and is therefore a work in progress. Each of the three areas of development is examined in separate chapters and each summarises the World Bank assistance strategy in that area. The conclusion is that the challenge posed by the objectives of this report are far beyond the World Bank's abilities to achieve on its own. Making Sustainable Commitments, 2001-01-01 CD ROM includes full text of the Strategy as well as other relevant information.

Improving Water Policy and Governance Cecilia Tortajada, Asit Biswas, 2013-09-13 Old forms of governance in both public and private sectors are becoming increasingly irrelevant because of rapidly changing conditions. Because of these changes both governance processes and the scope of the institutions through which power is exercised throughout society may have to undergo a radical break with the past and prevailing models of governance. Water sector is an integral part of the global system. Consequently its governance processes and the institutions responsible for its management must change as well in order to cope with the current challenges and potential future changes. Because of these current and future changes water governance may have to change more during the next 20 years compared to the past 2000 years if societal expectations are to be successfully met. All these changes will make water governance more complex than ever before witnessed in human history. Improving water governance will require good and objective analyses of case studies from different parts of the world as to what has worked, why and the enabling environments under which good governance has been possible. The present volume analyses case studies of good water governance from different parts of the world and for different water use sectors. It concludes with an analysis of the critical issues that should be considered for water.

governance and a priority research agenda for improving water governance in the future This book was published as a special issue of the International Journal of Water Resources Development The impact of UK overseas aid on environmental protection and climate change adaptation and mitigation Great Britain: Parliament: House of Commons: Environmental Audit Committee,2011-06-29 The Environmental Audit Committee states that the UK should only provide funding for multilateral institutions with strong environmental credentials The current scale of the World Bank s lending to fossil fuel powered energy generation is unacceptable and the Committee urges the Government to be prepared to vote against new World Bank funding for high emissions coal fired power stations The profile of climate change has increased hugely but there is far less awareness of the importance of protecting biodiversity and ecosystems The Committee believes that the Department for International Development DFID needs to publish a clear strategy on its approach to environmental issues to ensure that it gives them sufficient priority in its programmes and expenditure Every effort must be made to help emerging economies leap frog fossil fuels and fuel their growth with clean energy instead High levels of consumption in the UK increases demand on production in poor countries which leads to degradation of their natural resources The report calls on the UK Government to ensure that economic activity in Britain does not cancel out or even reverse the positive impact that UK aid is having overseas *Journal of Economic Literature* ,2007 DAC Guidelines and Reference Series Natural Resources and Pro-Poor Growth The Economics and Politics OECD,2009-01-27 Natural capital constitutes a quarter of total wealth in low income countries This publication demonstrates that natural resources can contribute to growth employment exports and fiscal revenues and highlights the importance of policies encouraging the sustainable management of these resources **IFPRI Annual Report 2005-2006: The promises and challenges of biofuels for the poor in developing countries.** International Food Policy Research Institute (IFPRI), **Handbook of Decentralised Governance and Development in India** D.
