*Ethnography as Risky Business* Kees Koonings, Dirk Kruijt, Dennis Rodgers, 2019-04-26 *Ethnography as Risky Business* Field Research in Violent and Sensitive Contexts offers a hands on critical appraisal of how to approach ethnographic fieldwork on socio political conflict and collective violence focusing on the global south The volume's contributions are all based on extensive firsthand qualitative social science research conducted in sensitive and often hazardous field settings The contributors reflect on real life methodological problems as well as the ethical and personal challenges such as the protection of participants research data and the ethnographic self In particular the authors highlight how risky ethnography requires careful maneuvering before during and after fieldwork on the basis of a situated ethics yet

**Identity, Agency and Fieldwork Methodologies in Risky Environments** Monique Marks,Julten

Abdelhalim,2020-06-29 Bringing together a unique set of narratives from social scientists who have been situated in risky environments this volume discusses the moral and ethical dilemmas of doing fieldwork in environments that are characterised by insecurity These narratives are situated in the Global South and the majority of the authors are themselves from the Global South bringing both authenticity and originality to the scholarship in this book Coming from the Global South can both facilitate and complicate navigating the complexity of doing research in places characterised by precariousness The authors demonstrate how the morality of the moment and indigenous sensibility is often more pertinent than formal ethical considerations as stipulated by universities and other institutions The authors are refreshingly honest about their own identity dilemmas their choices to exit the field prematurely and the raw emotions that emerged in the process of doing fieldwork in these settings This book is likely to be instructive to young researchers entering into fields that are risky often with little instruction or supervision prior to doing so It is also an excellent resource for more seasoned researchers who might have had comparable experiences and are keen to reflect on such research journeys It will be an invaluable resource for teaching qualitative research across a wide spectrum of disciplines This book was originally published as a special issue of Contemporary Social Science

**The Kurdish Women's Freedom Movement** Isabel Käser,2021-08-26 Amidst ongoing wars and insecurities female fighters politicians and activists of the Kurdish Freedom Movement are building a new political system that centres gender equality Since the Rojava Revolution the international focus has been especially on female fighters a gaze that has often been essentialising and objectifying brushing over a much more complex history of violence and resistance Going beyond Orientalist tropes of the female freedom fighter and the movement s own narrative of the free woman Isabel K ser looks at personal trajectories and everyday processes of becoming a militant in this movement Based on in depth ethnographic research in Turkey and Iraqi Kurdistan with women politicians martyr mothers and female fighters she looks at how norms around gender and sexuality have been rewritten and how new meanings and practices have been assigned to women in the quest for Kurdish self determination Her book complicates prevailing notions of gender and war and creates a more nuanced understanding of the everyday embodied epistemologies of violence conflict and resistance

**Harassed** Rebecca Hanson,Patricia Richards,2019-05-29 Researchers frequently experience sexualized interactions sexual objectification and harassment as they conduct fieldwork These experiences are often left out of ethnographers tales from the field and remain unaddressed within qualitative literature Harassed argues that the androcentric racist and colonialist epistemological foundations of ethnographic methodology contribute to the silence surrounding sexual harassment and other forms of violence Rebecca Hanson and Patricia Richards challenge readers to recognize how these attitudes put

researchers at risk further the solitude experienced by researchers lead others to question the validity of their work and in turn negatively impact the construction of ethnographic knowledge To improve methodological training data collection and knowledge produced by all researchers Harassed advocates for an embodied approach to ethnography that reflexively engages with the ways in which researchers bodies shape the knowledge they produce By challenging these assumptions the authors offer an opportunity for researchers advisors and educators to consider the multiple ways in which good ethnographic research can be conducted Beyond challenging current methodological training and mentorship Harassed opens discussions about sexual harassment and violence in the social sciences in general
