Women Without Class Girls Race And Identity:

Women without Class Julie Bettie, 2014-09-18 In this ethnographic examination of Mexican American and white girls coming of age in California's Central Valley Julie Bettie turns class theory on its head asking what cultural gestures are involved in the performance of class and how class subjectivity is constructed in relationship to color ethnicity gender and sexuality A new introduction contextualizes the book for the contemporary moment and situates it within current directions in cultural theory Investigating the cultural politics of how inequalities are both reproduced and challenged Bettie examines the discursive formations that provide a context for the complex identity performances of contemporary girls The book's title refers at once to young working class women who have little cultural capital to enable class mobility to the fact that analyses of class too often remain insufficiently transformed by feminist ethnic and queer studies and to the failure of some feminist theory itself to theorize women as class subjects *Women without Class* makes a case for analytical and political attention to class but not at the expense of attention to other social formations

Geographies of Campus Inequality Janel E. Benson, Elizabeth M. Lee, 2020-07-31 In efforts to improve equity selective college campuses are increasingly focused on recruiting and retaining first generation students those whose parents have not graduated from college In *Geographies of Campus Inequality* sociologists Benson and Lee argue that these approaches may fall short if they fail to consider the complex ways first generation status intersects with race ethnicity and gender Drawing on interview and survey data from selective campuses the authors show that first generation students do not share a universal experience Rather first generation students occupy one of four disparate geographies on campus within which they negotiate academic responsibilities build relationships engage in campus life and develop post college aspirations Importantly the authors demonstrate how geographies are shaped by organizational practices and campus constructions of class race and gender *Geographies of Campus Inequality* expands the understanding of first generation students campus lives and opportunities for mobility by showing there is more than one way to be first generation
