Touching A Nerve Our Brains Our Selves Patricia S Churchland:

Touching a Nerve Patricia Churchland, 2013-07-22 Describes the latest research in human brain function consciousness sensory experience and memory and discusses the ethical and philosophical dilemmas that can result from these new insights

Touching a Nerve Patricia Churchland, 2013-07-15 A trailblazing philosopher's exploration of the latest brain science and its ethical and practical implications What happens when we accept that everything we feel and think stems not from an immaterial spirit but from electrical and chemical activity in our brains In this thought provoking narrative drawn from professional expertise as well as personal life experiences trailblazing neurophilosopher Patricia S Churchland grounds the philosophy of mind in the essential ingredients of biology She reflects with humor on how she came to harmonize science and philosophy the mind and the brain abstract ideals and daily life Offering lucid explanations of the neural workings that underlie identity she reveals how the latest research into consciousness memory and free will can help us reexamine enduring philosophical ethical and spiritual questions What shapes our personalities How do we account for near death experiences How do we make decisions And why do we feel empathy for others Recent scientific discoveries also provide insights into a fascinating range of real world dilemmas for example whether an adolescent can be held responsible for his actions and whether a patient in a coma can be considered a self Churchland appreciates that the brain based understanding of the mind can unnerve even our greatest thinkers At a conference she attended a prominent philosopher cried out I hate the brain I hate the brain But as Churchland shows he need not feel this way Accepting that our brains are the basis of who we are liberates us from the shackles of superstition It allows us to take ourselves seriously as a product of evolved mechanisms past experiences and social influences And it gives us hope that we can fix some grievous conditions and when we cannot we can at least understand them with compassion

The Evolutionary Argument against Naturalism Jim Slagle, 2021-06-17 Contemporary discussions in metaphysics epistemology and philosophy of mind are dominated by the presupposition of naturalism Arguing against this established convention Jim Slagle offers a thorough defence of Alvin Plantinga's Evolutionary Argument against Naturalism EAAN and in doing so reveals how it shows that evolution and naturalism are incompatible Charting the development of Plantinga's argument Slagle asserts that the probability of our cognitive faculties reliably producing true beliefs is low if ontological naturalism is true and therefore all other beliefs produced by these faculties including naturalism itself are self defeating He critiques other well known epistemological approaches including those of Descartes and Quine and deftly counters the many objections against the EAAN to conclude that metaphysical naturalism should be rejected on the grounds of self defeat By situating Plantinga's argument within a wider context and showing that science and evolution cannot entail naturalism Slagle renders this most common metaphysical view irrational As such the book advocates an important reconsideration of contemporary thought at the intersection of philosophy science and religion

Touching a Nerve Patricia Smith Churchland, 2014 *The Journey*

Towards Compassionate A.I. Jean-Luc Mommaerts, 2020-03-06 It may take a few more decades but soon enough A I will turn into super A I This is an artificial intelligence which in all areas of what is now seen as human intelligence approaches this then surpasses it After that it will keep growing exponentially In the meantime at relatively short notice humanity will encounter a challenging A I bi bottleneck 1 humans possibly misusing A I in a big way and 2 A I spiraling into many directions of which any unfortunate one may be enough for disaster Will we control A I or will A I dominate us Let s hope this is the wrong question Because if it s the right question and given enough time there is no shred of a doubt about the answer Still of course we need to give it our best shot not to be dominated by an evil force We should strive for control At the same time transcending the question opens up the domain of Compassion This gradually makes thinking in terms of control and domination in human A I interactions obsolete We will together strive for a better world within an alignment of our values But what are the real human values There are cultural and individual differences Moreover what seem to be anyone s values may be a superficial layer above deeper values which are not necessarily congruent with conscious awareness So the human A I value alignment question will be how to align what I write in *The Journey about Compassion* as the striving to approach these values in their deeper sense They can subsequently be realized for each individual in two directions relief of deep suffering and enhancement of inner growth Both notions are to be clarified at the individual level Compassionate A I is the striving towards an A I that can help us to know and to realize ourselves in depth The beauty is that this way human A I value alignment and further development of A I can intrinsically go hand in hand Lisa is a software coaching chat bot that is being developed specifically with this goal helping humans and A I in Compassionate ways to become healthier stronger and more effectively Compassionate towards near ones as well as all sentient beings In this book super A I is the future kind of A I that may be able but not necessarily to act Compassionately We don t have to wait for that for Compassionate A I to become important Already humans can use A I more or less Compassionately From what point is it relevant as a characteristic of the A I system itself regardless of how humans use the A I There is no steep border Long before super A I the first systems in which it becomes more pertinent are those in which Compassion is part of the purpose That is systems that in communication with users are meant to give an effectively Compassionate experience To understand where Compassionate A I may be heading towards we need to understand Compassion This leads us on a journey starting on the one hand from data and on the other hand from drive to thrive life itself On this journey we encounter many insights about intelligence consciousness drive to thrive non conscious processing The end of the journey lies in full Compassion Hopefully this is the future for A I as well as humanity

Conscience Patricia Churchland, 2020-11-24 How do we determine right from wrong Conscience illuminates the answer through science and philosophy In her brilliant work Touching a Nerve Patricia S Churchland the distinguished founder of neurophilosophy drew from scientific research on the brain to understand its philosophical and ethical implications for identity consciousness free will and memory In Conscience she explores how moral systems arise from our physical selves in combination with environmental demands All social groups have ideals for behavior even though ethics vary among different cultures and among individuals within each culture In trying to understand why Churchland brings together an understanding of the influences of nature and nurture She looks to evolution to elucidate how from birth our brains are configured to form bonds to cooperate and to care She shows how children grow up in society to learn through repetition and rewards the norms values and behavior that their parents embrace Conscience delves into scientific studies particularly the fascinating work on twins to deepen our understanding of whether people have a predisposition to embrace specific ethical stands Research on psychopaths illuminates the knowledge about those who abide by no moral system and the explanations science gives for these disturbing individuals Churchland then turns to philosophy that of Socrates Aquinas and contemporary thinkers like Owen Flanagan to explore why morality is central to all societies how it is transmitted through the generations and why different cultures live by different morals Her unparalleled ability to join ideas rarely put into dialogue brings light to a subject that speaks to the meaning of being human *Philosophy of Brain* Howard

Burton, 2020-10-01 This book is based on an in depth filmed conversation between Howard Burton and neurophilosopher Pat Churchland UC San Diego Pat Churchland has done extensive research in the fields of philosophy of neuroscience philosophy of the mind and neuroethics During this mind stretching conversation Pat explores how the brain works how we are able to represent the external world of objects and our inner world of thoughts self and consciousness This carefully edited book

includes an introduction Of Mice and Men and questions for discussion at the end of each chapter I Playing with Brains Dissecting brains and meeting Francis Crick II Neuropioneers Ruffling philosophical feathers III Sociological Fault Lines Mind vs brain IV Connecting Horizontally Investigating philosophy of mind V Touching a Nerve Spreading the message VI Social Relevance Explorations of morality through biology VII Free Will An age old quandary resurfaces VIII Eliminative Materialism What it means and doesn't mean IX Consciousness Towards progress X Summing Up Some key questions About Ideas Roadshow Conversations Presented in an accessible conversational format Ideas Roadshow books not only explore frontline academic research but also reveal the inspirations and personal journeys behind the research **Synaptic Self** Joseph LeDoux, 2003-01-28 In 1996 Joseph LeDoux's The Emotional Brain presented a revelatory examination of the biological bases of our emotions and memories Now the world renowned expert on the brain has produced with a groundbreaking work that tells a more profound story how the little spaces between the neurons the brain's synapses are the channels through which we think act imagine feel and remember Synapses encode the essence of personality enabling each of us to function as a distinctive integrated individual from moment to moment Exploring the functioning of memory the synaptic basis of mental illness and drug addiction and the mechanism of self awareness Synaptic Self is a provocative and mind expanding work that is destined to become a classic **Synaptic Self** Joseph E. LeDoux, 2002 Joseph LeDoux believes that the synapses the little spaces between the neurons in our brains are the key to everything the brain does They are the channels of communication by which we think act imagine feel and remember But synapses do more They also allow interactions between mental processes allowing us to remember the important stuff in life better than the trivial What's more synapses encode the essence of the individual allowing us to be the same person from moment to moment week to week and year to year In short the self is synaptic
