Faith, Medical Alchemy and Natural Philosophy John T. Young, 2018-08-13 Published in 1998 this is a fundamental re assessment of the world view of the alchemists natural philosophers and intelligencers of the mid 17th century Based almost entirely upon the extensive and hitherto little researched manuscript archive of Samuel Hartlib it charts and contextualises the personal and intellectual history of Johann Moriaen c 1592 1668 a Dutch German alchemist and natural philosopher Moriaen was closely acquainted with many of the leading thinkers and experimenters of his time including Ren Descartes J A Comenius J R Glauber and J S K ffler His detailed reports of relations with these figures and his response to their work provide a uniquely informed insight into the world of alchemy and natural philosophy This study also illuminates the nature and mechanisms of intellectual and technological exchanges between Germany The Netherlands and England *The Sabbatean Prophets* Matt GOLDISH, Matt Goldish, 2009-06-30 In the mid seventeenth century Shabbatai Zvi a rabbi from Izmir claimed to be the Jewish messiah and convinced a great many Jews to believe him The movement surrounding this messianic pretender was enormous and Shabbatai s mission seemed to be affirmed by the numerous supporting prophecies of believers The story of Shabbatai and his prophets has mainly been explored by specialists in Jewish mysticism Only a few scholars have placed this large scale movement in its social and historical context Matt Goldish shifts the focus of Sabbatean studies from the theology of Lurianic Kabbalah to the widespread seventeenth century belief in latter day prophecy The intense expectations of the messiah in Christianity Judaism and Islam form the necessary backdrop for understanding the success of Sabbateanism The seventeenth century was a time of deep intellectual and political ferment as Europe moved into the modern era The strains of the Jewish mysticism Christian millenarianism scientific innovation and political transformation all contributed to the development of the Sabbatean movement By placing Sabbateanism in this broad cultural context Goldish integrates this Jewish messianic movement into the early modern world making its story accessible to scholars and students alike Table of Contents Preface Prologue 1 Messianic Prophecy in the Early Modern Context 2 Nathan of Gaza and the Roots of Sabbatean Prophecy 3 From Mystical Vision to Prophetic Explosion 4 Opponents and Observers Respond 5 Prophecy after Shabbatai s Apostasy Notes Index Reviews of this book Goldish looks at the Jewish messianic surge of the 17th century which culminated with the Sabbatean movement and places it in a broader multidimensional context He has produced a well written scholarly addition and modification to the literature Paul Kaplan Library Journal **Steel** Tony Fry, Anne-Marie Willis, 2015-02-26 Steel has over centuries played a crucial role in shaping our material and in particular urban landscapes This books undertakes a cultural and ecological history of the material examining the relationship between steel and design at a micro and macro level in terms of both what it has been used to design and how it has functioned as a world making force The research for the book is informed by diverse sources including industry journals contemporary accounts and technical literature all framed by rich early accounts of iron and steel making from the middle ages to the opening of the industrial age and most notably the crucial works of Vannoccio Biringuccio Georgius Agricola Andrew Ure and

Harry Scrivenor In contrast trans cultural accounts of the history of metallurgy from eminent sinologists and cultural historians like Joseph Needham and G E R Lloyd are used Readings on the pre history and history of science as well as histories and philosophies technology from scholars such as Siegfried Giedion Merritt Roe Smith L T C Rolt Robert B Gordon inform the analysis Social and economic history from historians such as Eric Hobsbawn William T Hogan and David Brody are consulted labour process theory is also examined particularly the influential writings of F W Taylor in the late 19th and early 20th centuries and his contemporary critics like David Noble and Harry Braverman Many other disciplines also inform the account histories of urban design and architecture transport and military history environmental history and geography

Evolution Somnath Bhattacharyya, 2023-09-29 This book reconceptualizes the ancient philosophy of dualism and a trinity applied to classical and quantum nonequilibrium phenomena In addition to classical mechanics and electrodynamics a remarkable connection of this philosophy with quantum mechanics is established which can be useful for quantum computing and the development of quantum artificial intelligence Packed with the recent theoretical models quantum simulations of black holes and experimental observations of quantum phase transitions this book brings a holistic approach that can be useful to refine the concept of the Creation i e the evolution of the Universe from the condensed state of matter and explain the artificial vision The approach is Unique Connects ancient philosophy classical and quantum mechanics materials and the latest quantum technologies Novelty High level of scientific interpretation of ancient philosophy creation interactions and disorder Multidisciplinary Guides students to learn quantum simulations and develop philosophical ideas The book contains over ten years of in depth research by the author on the ancient eastern Indian philosophy and the latest scientific research in condensed matter and quantum technology This book will simplify the picture of ancient eastern philosophy which can be read by the general audience particularly undergraduate postgraduate students interested in quantum information science without any mathematical treatment However some parts of the book will be ideal for senior academicians and professional researchers in both worlds

The Life and Behavior of Living Organisms Elliott Jaques, 2001-12-30 Jaques presents a totally new general theoretical foundation for understanding the individual and social behavior of all living organisms In contrast to existing theories of behavior which are static Jaques has succeeded in breaking through to a truly dynamic orientation This breakthrough resulted from his fundamental research into work organizations that led to the realization that the difference between inanimate processes and all living behavior is that all living behavior is composed of intentional goal directed work This continuous work entails the use of judgment in choosing goals and in making the decisions necessary to get to these goals This work process is the same in all living organisms including humans It is an ineffable process of the total organism inaccessible to direct observation and experience Intentionality is the dynamic of behavior This discovery has led over the past 50 years to extensive discoveries objective measures of work complexity and of the level of complexity capability of individuals in all species how human language differs from communication in other species the need to
