Wka 2015 Tech Manual:

Root, Tuber and Banana Food System Innovations Graham Thiele, Michael Friedmann, Hugo Campos, Vivian Polar, Jeffery W. Bentley, 2022-04-06 This open access book describes recent innovations in food systems based on root tuber and banana crops in developing countries. These innovations respond to many of the challenges facing these vital crops linked to their vegetative seed and bulky and perishable produce. The innovations create value, food jobs, and new sources of income while improving the wellbeing and quality of life of their users. Women are often key players in the production, processing, and marketing of roots, tubers, and bananas, so successful innovation needs to consider gender. These crops and their value chains have long been neglected by research and development; hence, this book contributes to filling the gap. The book features many outcomes of the CGIAR Research Program in Roots, Tubers, and Bananas (RTB), which operated from 2012 to 2021, encompassing many tropical countries, academic and industry partners, multiple crops, and major initiatives. It describes the successful innovation model developed by RTB that brings together diverse partners and organizations to create value for the end users and to generate positive economic and social outcomes. RTB has accelerated the scaling of innovations to reach many end users cost effectively. Though most of the book's examples and insights are from Africa, they can be applied worldwide. The book will be useful for decision makers designing policies to scale up agricultural solutions for researchers and extension specialists seeking practical ideas and for scholars of innovation.

Deserts and Desertification Yajuan Zhu, Qinghong Luo, Yuguo Liu, 2022-02-16 A desert is an ecosystem in an arid zone in which sand dunes cover the land and sandstorms often occur. Although desert vegetation is sparse, it plays an important role in ecosystem structure and function. Desertification is one of the most severe environmental problems today. Land desertification can be controlled through many measures such as eco villages, eco agriculture, biodiversity conservation, and the combination of engineering and biology. This edited volume provides new insights into the pattern of desert ecosystems and the progress of desertification control. It is a useful resource for researchers in ecology, forestry, and land desertification control.
