Women The Environment And Sustainable Development Towards A Theoretical Synthesis:

Women, the Environment and Sustainable Development Rosi Braidotti, International Research and Training Institute for the Advancement of Women, 1994 There is a widespread perception that the development process is in a state of multiple crisis While the notion of sustainable development is supposed to address adequately its environmental dimensions there is still no agreed framework relating women to this new perspective This book is an attempt to present and disentangle the various positions put forward by major actors and to clarify the political and theoretical issues that are at stake in the debates on women the environment and sustainable development Among the current critiques of the western model of development which the authors review are the feminist analysis of Science itself and the power relations inherent in the production of knowledge Women Environment and Development WED Alternative Development Environmental Reformism and Deep Ecology Social Ecology and Ecofeminism In traversing this important landscape of ideas they show how they criticise the dominant developmental model at the various levels of epistemology theory and policy The authors also go further and put forward their own ideas as to the basic elements they consider necessary in constructing a paradigmatic shift emphasising such values as holism mutuality justice autonomy self reliance sustainability and peace This unique work is a signally useful contribution to clarifying thinking on a topic with immense implications for all women Publisher's description

At the Point of Production Charles Levenstein, 2017-07-28 *At the Point of Production* a compilation of contributions to *New Solutions Journal of Occupational and Environmental Health Policy* locates workers health and safety problems in the broad political economy. It argues that without a deep understanding of the social political economic context of particular industries or workplaces we cannot fully grasp the process of recognition and control of industrial hazards. The contributors report on a series of case studies all of which used the point of production framework to investigate particular problems or industries. The focus of the first section is on globalization the impact of privatization on the health and safety of workers and communities in Brazil and Mexico. The next section addresses environmental issues the unintended effects of environmental regulation on workers the situation of hazardous waste workers and emergency responders the implementation of toxics use reduction and the role of workers in pollution prevention. In the third section the contributors explore the intersection of labor relations with gender relations at the point of production. A final chapter deals with some of the practical issues involved in conducting occupational health research in the contested terrain of the workplace.
