Designing and Conducting Gender, Sex, and Health Research

John L. Oliffe, Lorraine Greaves, 2011-04-18. This book is the first textbook dedicated to critically examining gender and sex in study designs, methods, and analysis in health research. In order to produce ethical, accurate, and effective research findings, it is vital to integrate both sex/biological characteristics and gender/socially constructed factors into any health study. This book draws attention to some of the methodological complexities in this enterprise and offers ways to thoughtfully address these by drawing on empirical examples across a range of topics and disciplines. Designing and Conducting Gender, Sex, and Health Research is an invaluable resource for students undertaking research in health sciences, medicine, nursing, gender studies, women's studies, epidemiology, health policy, psychology, and sociology. From John L. Oliffe and Lorraine Greaves.

Health Matters Eric Mykhalovskiy, Jacqueline Choiniere, Pat Armstrong, Hugh Armstrong, 2020-05-12. In *Health Matters*, contributors from a range of disciplinary and interdisciplinary traditions address multiple dimensions of health care, such as nursing, midwifery, home care, pharmaceuticals, medical education, and palliative care. Through their explorations, the book poses questions about the role that the forms of expertise associated with evidence-based health care play in shaping how we understand and organize health services. Authors critique instrumental/managerial ways of knowing health care and focus on how such ways of knowing limit our understandings of and responses to health care problems and are linked with the growing commodification, individualization, and privatization of Canadian health services. Working with analytic perspectives such as feminism, Marxist political economy, critical ethnography, science and technology studies, governmentality studies, and institutional ethnography, the volume demonstrates how critical social science perspectives contribute alternative perspectives about what counts as health care problems and how to best to address them.
