Word-formation in the World's Languages Pavol Štekauer, 2012 A pioneering book establishing the foundations for research into word formation typology Word-Formation in the World's Languages Pavol Štekauer, Salvador Valera, Livia Körtyvélyessy, 2012-04-23 Fills a gap in cross linguistic research by being the first systematic survey of the word formation of the world's languages Data from fifty five world languages reveals associations between word formation processes in genetically and geographically distinct languages **Word-Formation in the World's Languages** Pavol Štekauer, Salvador Valera, Livia Körtyvélyessy, Professor of English Linguistics Pavol Štekauer, 2014-05-14 A pioneering book establishing the foundations for research into word formation typology and tendencies It fills a gap in cross linguistic research by being the first systematic survey of the word formation of the world's languages Drawing on over 1500 examples from fifty five languages it provides a wider global representation than any other volume This data from twenty eight language families and forty five language genera reveals associations between word formation processes in genetically and geographically distinct languages Data presentation from two complementary perspectives semasiological and onomasiological shows both the basic functions of individual word formation processes and the ways of expressing selected cognitive categories Language data was gathered by way of detailed questionnaires completed by over eighty leading experts on the languages discussed The book is aimed at academic researchers and graduate students in language typology linguistic fieldwork and morphology **Language** George Melville Bolling, Bernard Bloch, 1987 **Word-Formation across Languages** Pavol Štekauer, Salvador Valera, Livia Körtyvélyessy, 2017-01-06 Research into cross linguistic aspects and typology of word formation has not been paid relevant and systematic attention by morphologists and only a few articles dealing with various word formation issues of this kind appear in journals The chapters in this volume address this issue by discussing on contrastive principles important questions of word formation in a sample of 26 languages The focus of the book as a whole is on typological features of word formation in the languages sampled It is aimed at researchers that have an interest in word formation in a variety of languages **Word-Formation** Peter O. Müller, Ingeborg Ohnheiser, Susan Olsen, Franz Rainer, 2015-03-30 This handbook comprises an in depth presentation of the state of the art in word formation The five volumes contain 207 articles written by leading international scholars The XVI chapters of the handbook provide the reader in both general articles and individual studies with a wide variety of perspectives word formation as a linguistic discipline history of science theoretical concepts units and processes in word formation rules and restrictions semantics and pragmatics foreign word formation language planning and purism historical word formation word formation in language acquisition and aphasia word formation and language use tools in word formation research The final chapter comprises 74 portraits of word formation in the individual languages of Europe and offers an innovative perspective These portraits afford the first overview of this kind and will prove useful for future typological research This handbook will provide an essential

reference for both advanced students and researchers in word formation and related fields within linguistics **Language Universals and Linguistic Typology** Bernard Comrie,1989 *New Challenges in Typology* Matti Miestamo,Bernhard Wälchli,2007 The sixteen chapters in this volume are written by typologists and typologically oriented field linguists who have completed their Ph D theses in the first four years of this millennium The authors address selected theoretical questions of general linguistic relevance drawing from a wealth of data hitherto unfamiliar to the general linguistic audience The general aim is to broaden the horizons of typology by revisiting existing typologies with larger language samples exploring domains not considered in typology before taking linguistic diversity more seriously strengthening the connection between typology and areal linguistics and bridging the gap to other fields such as historical linguistics and sociolinguistics The papers cover grammatical phenomena from phonology morphology up to the syntax of complex sentences The linguistic phenomena scrutinized include the following foot and stress tone infixation inflection vs derivation word formation polysynthesis suppletion person marking reflexives alignment transitivity tense aspect mood systems negation interrogation converb systems and complex sentences More general methodological and theoretical issues such as reconstruction markedness semantic maps templates and use of parallel corpora are also addressed The contributions in this volume draw from many traditional fields of linguistics simultaneously and show that it is becoming harder and maybe also less desirable to keep them separate especially when taking a broadly cross linguistic approach to language The book is of interest to typologists and field linguists as well as to any linguists interested in theoretical issues in different subfields of linguistics
