Clinical Cases in Dysfluency Kurt Eggers, Margaret Leahy, 2022-09-09 *Clinical Cases in Dysfluency* is an imperative work that introduces dysfluency in clinical and cultural contexts while encouraging reflection on clinical decision-making involving the assessment and management of clients. With inputs from eminent clinical researchers across the world, this text brings together diverse voices and expertise to provide readers with innovative ideas for their own practice. Featuring real-life case studies covering stuttering and cluttering in children and adults, it showcases the importance of evidence-based practice and practitioner reflection, demonstrating a range of approaches to address problems experienced with dysfluency and their management. The authors go on to discuss issues of stereotyping, resilience, and therapeutic commonalities in general and in multicultural contexts, whilst also introducing the discipline of Dysfluency Studies, where stuttering is considered positively in its complexity and not as a disorder.
