Working With The Grain Integrating Governance And Growth In Development Strategies:

Working with the Grain Brian Levy, 2014-08-28 The development discourse has long been dominated by best practices prescriptions for reform but these are not a useful way of responding to the governance ambiguities of the early 21st century Working with the Grain draws on both innovative scholarship and Brian Levy's quarter century of experience at the World Bank to lay out an alternative a practical analytically grounded with the grain approach to reducing poverty and addressing weaknesses in governance Best practice prescriptions confuse the goals of development with the journey of getting from here to there A strong rule of law capable and accountable governments and a flexible level playing field business environment are indeed desirable end points But the ability to describe well governed states does not conjure them into existence If the only available actions are all or nothing then efforts at change will almost certainly fall short leading to disillusion and despair By contrast this book takes as its point of departure the realities of a country's economy polity and society and directs attention towards the challenges of initiating and sustaining forward development momentum The book distinguishes among four broad groups of countries according to whether polities are dominant or competitive and whether institutions are personalized or impersonal identifies alternative options for governance and policy reform top down options which endeavor to strengthen formal institutions and options supporting the emergence of islands of effectiveness explores how to identify entry points for change where there is a good fit between divergent country contexts and alternative options for reform Sometimes the binding constraint to forward movement can be institutional making governance reform the priority at other times the priority can better be on inclusive growth Taking the decade or so time horizon of practitioners the aim is to nudge things along seeking gains that initially may seem quite modest but sometimes can give rise to a cascading sequence of change for the better

Working with the Grain Brian Levy, 2014 This text directs attention away from unattainable good governance and towards with the grain institutional reforms that can initiate and sustain development momentum It shows how to find a good fit between country context and governance reform with virtuous circles of change sometimes transforming seemingly modest reforms into a cascading sequence of gains

Research Handbook on Democracy and Development Gordon Crawford, Abdul-Gafaru Abdulai, 2021-03-26 Exploring and updating the controversial debates about the relationship between democracy and development this Research Handbook provides clarification on the complex and nuanced interlinkages between political regime type and socio economic development Distinguished scholars examine a broad range of issues from multidisciplinary perspectives across Africa Asia Europe Latin America and the Middle East

The Oxford Handbook of the South African Economy Arkebe Oqubay, Fiona Tregenna, Imraan Valodia, 2021-11-18 While sharing some characteristics with other middle income countries South Africa is a country with a unique economic history and distinctive economic features It is a regional economic powerhouse that plays a significant role not only in southern Africa and in the continent but also as a member of BRICS However there has been a lack of structural transformation and

weak economic growth and South Africa faces the profound triple challenges of poverty inequality and unemployment Any meaningful debate about economic policies to address these challenges needs to be informed by a deep understanding of historical developments robust empirical evidence and rigorous analysis of South Africa's complex economic landscape This volume seeks to provide a wide ranging set of original detailed and state of the art analytical perspectives that contribute to scientific knowledge as well as to well informed and productive discourse on the South African economy While concentrating on the more recent economic issues facing South Africa the handbook also provides historical and political context It offers an in depth examination of strategic issues in the country's key economic sectors and brings together diverse analytical perspectives

The Politics of Education in Developing Countries Samuel Hickey, Naomi Hossain, 2019 This book focuses on how politics shapes the capacity and commitment of elites to tackle the learning crisis in six developing countries It deploys a new conceptual framework to show how the type of political settlement shapes the level of elite commitment and state capacity to improving learning outcomes

Results Not Receipts Charles Kenny, 2017-06-20 In the aftermath of the invasion of Afghanistan the U S Agency for International Development supported the Afghan Ministry of Public Health to deliver basic healthcare to 90 percent of the population at a cost of 4 50 a head The program played a vital role in improving the country's health the number of children dying before the age of five dropped by 100 000 a year But accounting standards at the Ministry of Public Health concerned the United States Special Investigator General for Afghanistan There was no evidence of malfeasance nor argument about the success of the program For all that the results were fantastic receipts were not in order The investigator called for the health program to be suspended because of financial management deficiencies at the ministry This case illustrates a growing problem an important and justified focus on corruption as a barrier to development has led to policy change in aid agencies that is damaging the potential for aid to deliver results Donors have treated corruption as an issue they can measure and improve and from which they can insulate their projects at acceptable costs by controlling processes and monitoring receipts Results Not Receipts highlights the weak link between donors preferred measures of corruption and development outcomes related to our limited ability to measure the problem It discusses the costs of the standard anti corruption tools of fiduciary controls and centralized delivery and it suggests a different approach to tackling the problem of corruption in development focus on outcomes

Prisoners of the Past Steven Friedman, 2021-06-01 Building on the work of economic historian Douglass North and Ugandan political scholar Mahmood Mamdani Friedman argues that the difficulties besetting South African democracy are legacies of the past not products of the post 1994 era South Africa's democracy is often seen as a story of bright beginnings gone astray a pattern said to be common to Africa The negotiated settlement of 1994 it is claimed ended racial domination and created the foundation for a prosperous democracy but greedy politicians betrayed the promise of a new society In Prisoners of the Past Steven Friedman astutely argues that this misreads the nature of contemporary South Africa Building on the work of the economic historian

Douglass North and the political thinker Mahmood Mamdani Friedman shows that South African democracy's difficulties are legacies of the pre 1994 past. The settlement which ushered in majority rule left intact core features of the apartheid economy and society. The economy continues to exclude millions from its benefits while racial hierarchies have proved stubborn. Apartheid is discredited but the values of the pre 1948 colonial era, the period of British colonization, still dominate. Thus South Africa's democracy supports free elections, civil liberties and the rule of law but also continues past patterns of exclusion and domination. Friedman reasons that this path dependence is not as is often claimed the result of constitutional compromises in 1994 that left domination untouched. This bargain was flawed because it brought not too much compromise but too little. Compromises extended political citizenship to all but there were no similar bargains on economic and cultural change. Using the work of the radical sociologist Harold Wolpe, Friedman shows that only negotiations on a new economy and society can free South Africans from the prison of the past.

Public Sector Reform in South Africa 1994-2021 Robert Cameron, 2022-08-02. Public Sector Reform in South Africa 1994-2021 is an examination of specific public sector reforms in three core Public Administration areas in the democratic South Africa: political administrative relationships, the delegation of authority to senior managers and performance management.

Development Delusions and Contradictions David Sims, 2022-12-12. This book analyses the shortcomings of the Western development aid programme. Through exploring the evolution of aid over more than seven decades, development is examined as an industry with a variety of motives and actors. The driving forces and dynamics in the relationship between aid and economic development are highlighted in relation to faulty development structures and misaligned aims. With a particular focus on Egypt, radical questions are posed on how global aid and development can be improved, including how it can respond to the COVID 19 pandemic. This book aims to present an alternative aid framework to help overcome the dysfunctionality of the current international development system. It will be of interest to researchers and policymakers working within development economics and development policy.

Pockets of Effectiveness and the Politics of State-Building and Development in Africa Sam Hickey, 2023. This book shows that politics is the driving factor that shapes how well state agencies perform their roles. It deploys a new conceptual framework, the power domains approach, to explore the shifting fortunes of key state agencies in five countries: Ghana, Kenya, Rwanda, Uganda and Zambia over the past three decades.
