Total Privileged Access Management Tpm Administration:

The Zero Trust Framework and Privileged Access Management (PAM) Ravindra Das,2024-05-02 This book is about the Zero Trust Framework Essentially this is a methodology where the IT Network Infrastructure of a business is segmented into smaller islands each having its own lines of defense This is primarily achieved through the use of Multifactor Authentication MFA where at least three more authentication layers are used preferably being different from one another Another key aspect of the Zero Trust Framework is known as Privileged Access Management PAM This is an area of Cybersecurity where the protection of superuser accounts rights and privileges must be protected at all costs from Cyberattackers In this regard this is where the Zero Trust Framework and PAM intertwine especially in a Cloud based platform such as Microsoft Azure However as it has been reviewed in one of our previous books the use of passwords is now becoming a nemesis not only for individuals but for businesses as well It is hoped that by combining the Zero Trust Framework with PAM password use can be eradicated altogether thus giving rise to a passwordless society Information Security Management Handbook, Volume 5 Micki Krause Nozaki,Harold F. Security Justin McCarthy,2024-06-06 Traditional security measures focusing on controlling access at the front door are no longer sufficient in today s complex IT environments Simply validating privileged users and managing entry points overlooks the critical aspect of monitoring user activity within applications and data repositories The future of security lies in applying fine grained permissions to control user actions on critical resources and continuously assessing the risk profile of those users This necessitates a shift towards a Zero Trust model for privileged access management PAM where permissions are evaluated in a continuous fashion and every action is evaluated in real time against policies Zero Trust PAM is the most effective way for organizations to adapt to the evolving threat landscape while ensuring operational agility and productivity
