Hypernomics The Girls' Car Handbook Maria McCarthy, 2009-08-20. There are 15 million women drivers in the UK, yet so often they can feel at a disadvantage when it comes to dealing with the male-dominated motor industry. However, many women don't have a car-savvy bloke easily to hand and would prefer to be more independent anyway. This is where The Girls' Car Handbook comes in. A vital reference book, it is packed with useful information designed to give women greater confidence when tackling every aspect of motoring, from getting a good deal when buying a car, personal safety when driving, handling accidents and breakdowns, tips for greener motoring, and much, much more. How to Live a Low-Carbon Life Christopher Goodall, 2012-05-04. Climate

change is the greatest challenge facing humanity; drastic reduction of carbon emissions is vital if we are to avoid a catastrophe that devastates large parts of the world. Governments and businesses have been slow to act, and individuals now need to take the lead. The Earth can absorb no more than 3 tonnes of carbon dioxide emissions each year for every person on the planet; if we are to keep temperature and rainfall change within tolerable limits. Yet from cars and holiday flights to household appliances and the food on our plates, Western consumer lifestyles leave each of us responsible for over 12 tonnes of carbon dioxide a year, four times what the Earth can handle. Individual action is essential if we want to avoid climate chaos. How to Live a Low Carbon Life shows how easy it is to take responsibility, providing the first comprehensive one-stop

reference guide to calculating your CO₂ emissions and reducing them to a sustainable 3 tonnes a year. Handbook of Energy Efficiency and Renewable Energy D. Yogi Goswami, Frank Kreith, 2007-05-07.
