Le Corbusier, the Dishonest Architect Malcolm Millais, 2018-01-23 This is not a book for architects but for all those that have suffered consciously and unconsciously from modern architecture and have wondered how it came about This was largely due to one man an architect called Le Corbusier For some he was a genius but the truth is he was a sham a fake a charlatan whose only gift was for self publicity He was the most influential architect of the second half of the twentieth century his influence overwhelmed the architectural profession on a global scale who swallowed his publicity whole and still hold him in awe For the rest of the world the mere mortals his influence was disastrous as traditional buildings were destroyed and replaced by featureless boxes of varying sizes imposing a dreariness hitherto unimagined As usual it was the poor who suffered most as they were herded into tower blocks These were often grouped into estates that ringed many towns and cities which then degenerated into high rise slums with all the well known attendant social problems This book exposes the myths that surround Le Corbusier detailing the endless failures of his proposals and his projects These were due to his profound dishonesty both as a person and as an architect His legacy was an architectural profession that believed and still believe they were designing buildings based on logic functionality and honesty whereas they were doing the opposite
