The leaves are a vibrant yellow-green color, showing the characteristic fan shape and the fine, parallel veins that radiate from the base. They are set against a dark, almost black background, which makes the leaves stand out. The lighting is soft, highlighting the texture and edges of the leaves.

However nonscientific factors may be at least as important as the scientific ones. Among such factors are cultural, political, administrative and economic considerations. The articles in this volume provide an international perspective on how such pervasive factors impact on the development, research and practice of alternative medicine in the world.

African Traditional Medicine: Autonomy and Informed Consent Peter Ikechukwu Osuji, 2014-07-18 This book focuses on informed consent in African Traditional Medicine. ATM forms a large portion of the healthcare systems in Africa. WHO statistics show that as much as 80% of the population in Africa uses traditional medicine for primary health care. With such a large constituency it follows that ATM and its practices should receive more attention in bioethics. By comparing the ethics of care approach with the ATM approach to Relational Autonomy In Consent (RAIC), the authors argue that the ATM focus on consent based on consensus constitutes a legitimate informed consent. This book is distinctive insofar as it employs the ethics of care as a hermeneutic to interpret ATM. The analysis examines the ethics of care movement in Western bioethics to explore its relational approach to informed consent. Additionally, this is the first known study that discusses healthcare ethics committees in ATM.
