Real Book of Real Estate (Volume 2 of 2): Real Experts. Real Stories. Real Life. Robert Kiyosaki,2010-05 From the 1 bestselling author of Rich Dad Poor Dad comes the ultimate guide to real estate the advice and techniques every investor needs to navigate through the ups downs and in betweens of the market Show Me the Money! ,2002 *Living Into Leadership* Bowen H. McCoy,2007 A Journey in Ethics is a testimonial to living an engaged yet balanced business life and sustaining your core values *Interior Urbanism* Charles Rice,2016-02-25 Vast interior spaces have become ubiquitous in

the contemporary city The soaring atriums and concourses of mega hotels shopping malls and transport interchanges define an increasingly normal experience of being inside in a city Yet such spaces are also subject to intense criticism and claims that they can destroy the quality of a city s authentic life on the outside Interior Urbanism explores the roots of this contemporary tension between inside and outside identifying and analysing the concept of interior urbanism and tracing its history back to the works of John Portman and Associates in 1960s and 70s America Portman increasingly recognised as an influential yet understudied figure was responsible for projects such as Peachtree Center in Atlanta and the Los Angeles Bonaventure Hotel developments that employed vast internal atriums to define a world of possibilities not just for hotels and commercial spaces but for the future of the American downtown amid the upheavals of the 1960s and 70s The book analyses Portman s architecture in order to reconsider major contexts of debate in architecture and urbanism in this period including the massive expansion of a commercial imperative in architecture shifts in the governance and development of cities amid social and economic instability the rise of postmodernism and critical urban studies and the defence of the street and public

space amid the continual upheavals of urban development In this way the book reconsiders the American city at a crucial time in its development identifying lessons for how we consider the forces at work and the spaces produced in cities in the present

Whitten, 1997-04-22 The second volume in the Handbook of American Business History series this book offers concise histories of extractive manufacturing and service industries as well as extensive bibliographic essays pointing to the leading sources on each industry and bibliographic checklists

Supplementing other bibliographic materials in business history this volume provides researchers with a much needed path through the vast array of material available in the library and on the Internet Indicating which resources to check and which to bypass the book is a guide to a sometimes overwhelming amount of information Each of the book's chapters provides a concise industry history beginning with the industry's rise to importance in the U S and continuing to the present The bibliographic essays provide a narrative outline of the leading sources published or made available in archives libraries or museum collections since 1971 when Lovett's American Economic and Business History Information Sources was published Each discussion concludes with a bibliographic checklist of the titles mentioned in the essay as well as other titles In a rapidly expanding information society researchers teachers and students may be easily overwhelmed by the exhaustive material available in print and electronically What is useful and what can be ignored is a strategic question and few know where to begin This book provides a guide

Whose 'Eyes on the Street' Control Crime? Shannon J. Linning, John E. Eck, 2021-12-02 Jane Jacobs coined the phrase eyes on the street to depict those who maintain order in cities Most criminologists assume these eyes belong to residents In this Element we show that most of the eyes she described belonged to shopkeepers and property owners They along with governments wield immense power through property ownership and regulation From her work we propose a Neo Jacobian perspective to reframe how crime is connected to neighborhood function through deliberate decision making at places It advances three major turning points for criminology This includes turns from 1 residents to place managers as the primary source of informal social control 2 ecological processes to outsiders deliberate actions that create crime opportunities and 3 a top down macro to bottom up micro spatial explanation of crime patterns This perspective demonstrates the need for criminology to integrate further into economics political science urban planning and history to improve crime control policies
