Anthropocene Theater and the Shakespearean Stage William H. Steffen, 2023-02-20 Anthropocene Theater and the Shakespearean Stage revises the anthropocentric narrative of early globalization from the perspective of the non human world in order to demonstrate Nature s agency in determining ecological economic and colonial outcomes It welcomes readers to reimagine theater history in broader terms and to account for more non human and atmospheric players in the otherwise anthropocentric history of Shakespearean performance This book analyses plays horticultural manuals cosmetic recipes Puritan polemics and travel writing in order to demonstrate how the material practices of the stage both catalyze and resist early forms of globalization in an ecological arena William Steffen addresses the role of an understudied ecological performance history in determining Shakespeare s iconic cultural status and models how non human players have undermined Shakespeare s authoritative role in colonial discourse Finally this book makes a celebratory argument for the humanities in the age of climate change and invites interdisciplinary engagement a research community that is compelled to find strategies for cultivating a hopeful tomorrow amidst unprecedented anthropogenic environmental changes

International Catalogue of Scientific Literature , Ash Edward Parker, 2021-05-19 Ash is a beautifully illustrated account of the botanical and cultural faces of the ash tree The book maps the tree s evolution and geographical spread across the entire Northern Hemisphere over the last 44 million years and describes the 43 species that grace the planet today Edward Parker also explores the botany cultural history and medicinal uses of the tree from its significance in ancient Indo European cultures to its remarkable properties in treating Alzheimer s disease In addition he looks at topical issues such as the devastating effects that the spread of the emerald ash borer beetle and the ash dieback fungal infection are having on Northern Hemisphere forests Yew Fred Hageneder, 2013-10-15 A comprehensive and richly illustrated history Yew will appeal to botanists and other readers interested in the history and symbolism of the natural world now in paperback The yew is the oldest and most common tree in the world but it is a plant of puzzling contradictions it is a conifer with juicy scarlet berries but no cones deer can feast on its poisonous foliage but it is lethal to farm animals and it thrives where other plants cannot because of its extraordinarily low rate of photosynthesis Exploring this paradoxical plant in Yew Fred Hageneder surveys its position in religious and cultural history its role in the creation of the British Empire and its place in modern medicine Hageneder explains the way the yew is able to renew itself from the inside by producing interior roots and how early humans fascinated with its regenerative powers began to associate the tree with concepts of life and death the afterlife and eternity As such it can be found at the sacred sites of Native Americans Buddhists and Shinto shrines in Japan and it has become a living symbol of the resurrection for the Christian faith He describes how churchyards saved many yews during the Middle Ages when the trees were used for the mass production of the longbow which laid the foundation for the British Empire Finally he discusses the latest scientific discoveries about the yew including its use in cancer treatments
