DESCRIPTION

The HRA Series condensing unit is the outdoor part of a versatile system of air conditioning. It is designed to be custom matched with one of UPG's complete line of evaporator sections, each designed to serve a specific function. Matching Air Handlers are available for upflow, downflow or horizontal applications to provide a complete system. Electric Heaters are available if required. Add-On coils are available for use with upflow, downflow or horizontal furnaces and air handlers.

FEATURES

- **QUALITY CONDENSER COILS** - The coil is constructed of enhanced copper tube and aluminum fins.
- **COIL PROTECTION** - Coils are protected from damage by a polymer mesh applied between the coil face, and a PVC coated steel coil guard.
- **PROTECTED COMPRESSOR** - The compressor is internally protected against high pressure and temperature. This is accomplished by the simultaneous operation of high pressure relief valve and a temperature sensor which protects the compressor if undesirable operating conditions occur. A liquid line filter-drier further protects the compressor.
- **DURABLE FINISH** - Cabinet is made of pre-painted steel. The pre-treated flat galvanized steel provides a better paint to steel bond, which resists corrosion and rust creep. Special primer formulas and matted-textured finish insure less fading when exposed to sunlight.
- **LOWER INSTALLED COST** - Installation time and costs are reduced by easy power and control wiring connections. Discharge line heat exchanger knockouts are provided, if required. Available in sweat connect models only. The unit contains enough refrigerant for matching indoor coils and 15 feet of interconnecting piping. The small base dimension means less space is required on the ground or roof.
- **TOP DISCHARGE** - The warm air from the top mounted fan is blown up away from the structure and any landscaping. This allows compact location on multi-unit applications.
- **LOW OPERATING SOUND LEVEL** - The upward air flow carries the normal operating noise up away from the living area. The rigid top panel effectively isolates any motor sound. Isolator mounted compressor and the rippled fins of the condenser coil muffle the normal fan motor and compressor operating sounds.
- **LOW MAINTENANCE** - Long life permanently lubricated motor-bearings need no annual servicing.
- **EASY SERVICE ACCESS** - Fully exposed refrigerant connections, a single panel covering the electrical controls and the molex plug in the control box connecting the condenser fan, make for easy servicing of the unit.
- **SECURED SERVICE VALVES** - Secured re-usable service valves are provided on both the liquid and vapor sweat connections for ease of evacuating and charging.
- **FACTORY TESTED** - to verify system operation and control functioning before shipment.

York Manual:

Ministry to the Sick and Dying in the Late Medieval Church Thomas M. Izbicki, 2023-09 The focus of this volume is on ministry to the sick and dying in the later Middle Ages especially providing them with the sacraments Medieval writers linked illness to sin and its forgiveness The priest as physician of souls was expected to heal the soul preparing it for the hereafter His ministry might also effect healing of bodies when that healing did not endanger the soul This book treats how a priest prepared to visit sick persons and went to them in procession with the Eucharist and oil of the sick The priest was to comfort the patient and if death was imminent prepare the soul for the hereafter Canon law theology and ritual sources are employed Three sacraments penance viaticum final communion and extreme unction anointing of the sick are treated in detail Sickbed confession was designed to forgive the ailing person's mortal sins A priest could absolve a dying person of all sins even those reserved to a bishop or the pope Viaticum was to strengthen a suffering Christian for life's last conflict that between angels and demons for the soul of the dying person The deathbed thus was a spiritual battlefield Extreme unction was reserved for those in danger of death relieving the soul of venial sins or the remains of sin even after confession and absolution The commendatio animae commendation of the soul used with the dying was to usher the soul into the afterlife Many works have been written about attitudes toward death dying and the afterlife in the Middle Ages Likewise there is a good deal of literature about individual sacraments This study aims at bridging between these literatures with a focus on the priest and parishioner in both theory and practice at the sickbed
