Affluence, Mobility and Second Home Ownership Chris Paris, 2010-10-04 Despite the current recession the frequency of second home ownership is still surprisingly high throughout the western world While the UK and Ireland previously had lower occurrences of multiple dwellings compared to the rest of Europe they are quickly catching up with a current surge in the ownership of second homes The recent MP expenses scandal in the UK has also drawn attention to the prevalence of second homes or more within the middle classes and the fact that the concept is becoming increasingly popular Chris Paris uses this text to address the

reasons behind why second homes are becoming more popular both within the usual domicile of the individuals and in international locations. The socioeconomic factors and historical contexts of homes in cultures across the world are fundamental to explaining the choices in transnational home ownership and Paris case studies and comparisons between additional homes in Europe, Australia, America and Asia expand upon the motivation for people to own a second home. Affluence, Mobility and Second Home Ownership draws together debates on gentrification, globalisation, consumerism, environmental factors and investment to provide a balanced look at the pros and cons of second home ownership and what implications it has for the future. An ideal text for students studying geography, urbanism and planning, this book is also of interest to individuals interested in the changing ways in which we make choices on our places of residence.

Second Homes and Climate Change Bailey Ashton Adie, C. Michael Hall, 2023-07-17 This book is the first to address the important interrelationship between second homes and climate change which has become an increasingly relevant issue for many regions around the world. The chapters provide an array of international case studies and climate change impacts including the changing biocultural landscapes in Italy, hazard risks in the mountains of Poland and the shifting media discussion on second homes and climate change in Finland. Topics covered focus on issues around planning and governance in second home locations, adaptation and mitigation measures implemented by second home owners and the influence of second home owners' place attachment in relation to second home impacts. It introduces the overall topic of second homes and climate change while also laying the groundwork for future work in this burgeoning area of research. This book will be of significant interest to upper level undergraduates, graduate students and academics in the fields of geography, tourism, planning, housing studies, regional development, environmental management and disaster management.
