Tourism Sustainability Development Globalisation Tourism:

Tourism and Sustainability Martin Mowforth, Ian Munt, 2003-12-08 Tourism and Sustainability explores and challenges the notions of development sustainability globalisation and power and their relationship to contemporary tourism in the third world

Tourism and Sustainability Marti Mowforth, 2008

Tourism and Sustainability Martin Mowforth, Ian Munt, 2015-12-22 By January 2015 the world's richest 80 people had as much wealth as the poorest 50 per cent of the world's population. It is a global unevenness through which the barriers to immigration of Third World migrants to wealthy First World nations go ever higher while the barriers to travel in the reverse direction are all but extinct. So how exactly does tourism contribute to narrowing this glaring inequality between the rich and poor? Are ever expanding tourism markets a smoke-free socioculturally sensitive form of human industrialisation? Is alternative tourism really a credible lever for reducing global inequality and eliminating poverty? Tourism and Sustainability critically explores the most significant universal geopolitical norms of the last half century development globalisation and sustainability and through the lens of new forms of tourism demonstrates how we can better get to grips with the rapidly changing new global order. The fourth edition has been extensively revised and updated and benefits from the addition of new material on climate change and tourism. Drawing on a range of examples from across the Third World Mowforth and Munt expertly illustrate the social economic and environmental conditions that continue to affect the tourism industry. With the first edition hailed by Geoffrey Wall as one of the most significant books produced on tourism since the turn of the millennium Tourism and Sustainability remains the essential resource for students of human geography environmental sciences and studies politics development studies anthropology and business studies as well as tourism itself.

Sustainable Tourism Rob Harris, Peter Williams, Tony Griffin, 2012-05-16 Sustainable Tourism is vital reading for anyone seeking to understand the complexities associated with sustainable tourism development and how government and industry have responded to the challenges the concept poses. The major areas addressed in this edited volume are perspectives and issues associated with the concept of sustainable tourism development accreditation education and interpretation including specific examples such as Green Globe 21 the European Blue Flag Campaign and the WWF's PAN Parks Programme sustainable tourism case studies of tourist destination regions natural areas and tourism enterprises drawn from Africa Australia the South Pacific North America South east Asia and the Caribbean. An impressive international editorial team has combined to present in this text not only a variety of perspectives on sustainable tourism development but also significant insights into barriers challenges and current industry and government responses to it in various parts of the globe. Sustainable Tourism will be a welcome addition to the libraries of tourism industry professionals individuals involved in the management of natural areas tourism policy makers tourism academics and students with an interest in the future sustainability of tourism and the industry that supports it.

Gender and Tourism Sustainability Claudia Eger,Ana María Munar,Cathy H.C. Hsu,2023-03-21 This book examines the relationship between gender and sustainability in tourism Whilst an extensive body of work exists in the areas of gender and sustainability these two fields of knowledge are seldom combined to examine tourism phenomena When we look at the evolution of tourism we see that sustainability has become an essential element in educational programmes policy making and strategic considerations for organisations and destinations Whilst the beginnings of tourism sustainability were

challenging presently its relevance is seldom questioned However this situation is not the case with gender research Although gender theorising and research have existed for over a century and a rich legacy of knowledge exists on this topic meaningful and respectful engagement with this line of scholarship is thus far peripheral in tourism studies The aim of this book is to reflect on and rethink the intersection of gender and tourism sustainability through the lens of gender theory and feminist epistemology to stay with the trouble and devise pathways for sustainability gender knowledge This book will be of great interest to students researchers and academics in tourism gender and sustainability as well as tourism management The chapters in this book were originally published as a special issue of the Journal of Sustainable Tourism *Sport Tourism and Local Sustainable Development* Claude Sobry, Sorina Cernaianu, 2022-02-08 Sport tourism is now widely regarded as a tool for sustainable local development This book brings together 24 authors from a range of countries to address this topic with analyses ranging from particular types of events to more theoretical approaches concerning the role of sport tourism in the development of Spanish cities or the digital communication of sporting events in Italy as a means of promotion The book is geared towards academic researchers and students interested in sport tourism sport economics management and sustainable development as well as policymakers and professionals tasked with dynamic tools to promote their territory

Sustainable Tourism Development Lotte von Lignau, 2013-07-04 Seminar paper from the year 2013 in the subject Tourism Miscellaneous grade 2 0 University of Applied Sciences Bremen IGC course Sustainable Tourism Management language English abstract The world's resources are limited and will sooner or later come to an end This is an undeniable fact as the consequences of decades of reckless exploitation are painfully being brought to our eyes by countless reports on continuing ozone depletion growing desertification fatal meltdown of the polar caps and inexorable global warming Yet the plain realization does not always go hand in hand with immediate action While there is a new global consciousness towards ecology and the preservation of nature there is still a long way to go in order to avert the earth's destruction The tourism sector being described by the UNWTO 2012 p 2 as one of the world's largest and fastest growing industries plays a crucial role in this context The enormous growth not only in the transportation sector holds a major responsibility for increasing CO2 emissions worldwide But it is not only the environmental destruction that the tourism industry needs to fear and assume responsibility for Negative impacts of Globalization are being excellerated as the tourism sector continues to grow The rich become richer on the expense of the poor local communities are being exploited as tourist attractions and traditions and social structures get lost due to increasing intercultural contacts If the tourism industry does not take immediate action it will destroy its most important resources beautiful nature traditional culture and the hospitality of local people But is it really this easy Are all globalization effects negative Do the poor always have to be the losers in this process Is it exploitation when local communities show their traditions to foreigners Or is it a welcome opportunity to generate new income and improve the well being of the people Who decides what is good for the world and on what basis For many tourism businesses the the term

sustainable development has become a keyword Can this concept show a way out of the dilemma Or is it just an empty shell used to improve one s reputation and boost sales These are some of the questions that will be addressed in this paper in order to evaluate the future of the concept of sustainable development for the tourism industry

Sustainable Tourism

Thomas Walker, Ender Demir, Gabrielle Machnik-Kekesi, Victoria Kelly, 2024-06-28 This edited volume aims to ignite an academic discussion regarding necessary and urgent adaption and mitigation strategies for the tourism industry Now more than ever there is a need for designing and implementing concrete strategies for a world in which tourism practices are sustainability minded not only to rescue this key industry from the devastating effects of the COVID 19 pandemic but also to limit the effects that it has on pollution climate change and at risk populations Achieving this goal will require innovations that can help us synchronously adapt to committed change as well as shift our planning processes and alter our behaviours Including contributions from international experts in the fields of tourism management economics political science finance business and sustainability this book provides much needed research on sustainable tourism by evaluating current and future trends global contributions case studies and new research evaluating issues such as over tourism and under tourism as well as the general effects that tourism have on a region s economy environment culture and society In addition it will explore how sustainable tourism can help alleviate mitigate or control these problems This book aims to provide insight into how we can still enjoy and benefit from touristic travel while implementing appropriate strategies and adaptation plans in the areas of health culture the economy and the environment and showcase investigations of alternative tourism frameworks and tourist perspectives It will be of great interest to academic and practitioner communities in business and policy as well as economics tourism management development studies finance cultural heritage management policymaking and entrepreneurship

Tourism and Degrowth Robert Fletcher, Ivan Murray Mas, Asunción Blanco Romero, Macià Blázquez-Salom, 2020-06-29 Tourism and Degrowth develops a conceptual framework and research agenda for exploring the relationship between tourism and degrowth Rapid and uneven expansion of tourism as a response to the 2008 economic crisis has proceeded in parallel with the rise of social discontent concerning so called overtourism Meanwhile despite decades of concerted global effort to achieve sustainable development socioecological conflicts and inequality have rarely reversed but in fact increased in many places Degrowth understood as both social theory and social movement has emerged within the context of this global crisis However thus far the vibrant degrowth discussion has yet to engage systematically with the tourism industry in particular while by the same token tourism research has largely neglected explicit discussion of degrowth This volume brings the two discussions together to interrogate their complementarity Identifying a growth imperative in the basic structure of the capitalist economy the contributors contend that mounting critique of overtourism can be understood as a structural

response to the ravages of capitalist development more broadly Debate concerning overtourism thus offers a valuable opportunity to re politicise discussion of tourism development generally Exploring of the potential for degrowth to facilitate a truly sustainable tourism Tourism and Degrowth will be of great interest to scholars of tourism environmental sustainability and development The chapters were originally published as a special issue of the Journal of Sustainable Tourism Ethical and Responsible Tourism Marko Koščak,Tony O'Rourke,2019-10-21 Ethical and Responsible Tourism explains the methods and practices used to manage the environmental impact of tourism on local communities and destinations The three core themes of the book destination management environmental and social aspects of ethical sustainable development and business impacts are discussed across both topic and case study chapters alongside explanatory editorial analysis with all chapters clearly signposted and interlinked The case studies address specific and practical examples from a global range of examples including sites in Australia Central America Europe Union countries Japan North America and South America Used as a core textbook the linking of theory in the topic chapters and practice gained through case studies alongside further reading and editorial commentary Ethical and Responsible Tourism provides a detailed and comprehensive learning experience Specific case studies can be used as standalone examples as part of a case teaching approach and the editorial and discussion elements are designed to be suitable for those simply seeking a concise overview such as tourism professionals or potential investors in sustainable tourism projects This book will be essential reading for students researchers and practitioners of tourism environmental and sustainability studies *Tourism Development and the Environment: Beyond Sustainability?* Richard Sharpley,2009-09-02 Tourism Development and the Environment Beyond Sustainability challenges the sustainable tourism development paradigm that has come to dominate both theoretical and practical approaches to tourism development over the last two decades It extends the sustainable tourism debate beyond the arguably managerialist blueprint and destination focused approach that continues to characterise even the most recent sustainability agenda within tourism development Reviewing the evolution of the sustainable tourism development concept its contemporary manifestations in academic literature and policy developments and processes the author compares its limitations to prevailing political economic socio cultural and environmental contexts He then proposes alternative approaches to tourism development which nevertheless retain environmental sustainability as a prerequisite of tourism development This book also acts as an introduction to the Earthscan series Tourism Environment and Development About the series Tourism Environment and Development aims to explore within a variety of contexts the developmental role of tourism as it relates explicitly to its environmental consequences Each book will review critically and challenge traditional perspectives on sustainable tourism development exploring new approaches that reflect contemporary economic socio cultural and political contexts **Tourism and Development in the Developing World** David J. Telfer,Richard Sharpley,2015-12-14 Tourism is widely considered to be an important factor in socio economic development particularly in

less developed countries However despite almost universal recognition of tourism s development potential the extent to which economic and social progress is linked to the growth of a country s tourism sector remains the subject of intense debate Tourism and Development in the Developing World offers a thorough overview of the tourism development relationship Focusing specifically on the less developed world and drawing on contemporary case studies this updated second edition questions widely held assumptions on the role of tourism in development and seeks to highlight the challenges faced by destinations seeking to achieve development through tourism The introductory chapter establishes the foundation for the book exploring the meaning and objectives of development reviewing theoretical perspectives on the developmental process and assessing the reasons why less developed countries are attracted to tourism as a development option The concept of sustainable development as the most widely adopted contemporary model of development is then introduced and its links with tourism critically assessed Subsequent chapters explore the key issues associated with tourism and development including the rise of globalization the tourism planning and development process the relationship between tourism and communities within which it is developed the management implications of trends in the demand for and uptake of tourism and an analysis of the consequences of tourism development for destination environments economies and societies A new chapter considers the challenges of climate change sustainability of resource supply oil water and food global economic instability political instability and changing demographics Finally the issues raised throughout the book are drawn together in a concluding chapter that assesses the tourism and development dilemma Combining an overview of essential concepts theories and knowledge with an analysis of contemporary issues and debates in tourism and development this new edition will be an invaluable resource for those investigating tourism issues in developing countries The book will be of interest to students of tourism development geography and area studies international relations and politics and sociology

Rethinking Tourism and Development Richard Sharpley, David J. Telfer, 2023-09-06 Rethinking Tourism and Development provides a critical analysis of the tourism industry s impact on development and the environment While tourism contributes significantly to the global economy it also generates environmental costs that can no longer be ignored This book challenges the conventional paradigm of sustainable tourism development and proposes a radical new approach to address the negative impacts of tourism centred on degrowth
