Tracking Nuclear Proliferation 1998 A Guide To Maps And Charts:

The Nuclear Shadow over South Asia, 1947 to the Present Kaushik Roy, 2017-03-02 This collection of seminal articles illustrates the reasons for the spiraling nuclear race in the Asian subcontinent and introduces the principal debates in the field. Authors discuss whether the acquisition of nuclear weapons by the South Asian powers has raised the likelihood of a nuclear war in the subcontinent or reduced the chance of a conventional war breaking out. They examine whether a small nuclear arsenal or a nuclear triad as declared by India is suitable for bringing stability to the region as well as the risk of an accidental nuclear conflagration. The first section charts the evolution of nuclear programmes on the basis of realpolitik and the second section analyses nuclear policies on the basis of religious and cultural ethos. A few essays turn the spotlight on the role of external powers in accelerating, decelerating and mediating the ongoing nuclear tension between India and Pakistan.

Pakistan's Nuclear Policy Zafar Khan, 2014-07-17 In May 1998 in reaction to India's nuclear weapons tests, Pakistan tested six nuclear weapons. Following this, the country opted for a policy of minimum deterrence and within a year Pakistan had altered its policy stance by adding the modifier of minimum credible deterrence. This book looks at how this seemingly innocuous shift seriously impacted on Pakistan's nuclear policy direction and whether the concept of minimum has lost its significance in the South Asian region's changed strategic environment. After providing a brief historical background, exploring why and how Pakistan carried out the nuclear development program, the book questions why Pakistan could not sustain the minimum deterrence that it had conceptualized in the immediate aftermath of the 1998 test. It examines the conceptual/theoretical framework of the essentials of minimum deterrence in order to question whether Pakistan's nuclear policy remained consistent with this as well as to discover the rudimentary factors that are responsible for the inconsistencies with regard to minimum deterrence conceived in this study. The book goes on to look at the policy options that Pakistan had after acquiring the nuclear capability and what the rationale was for selecting minimum deterrence. The book not only highlights Pakistan's deterrent force building but also analyzes closely Pakistan's doctrinal posture of first use option. Furthermore, it examines the policy towards arms control and disarmament and discusses whether these individual policy orientations are consistent with the minimum deterrence. Conceptually providing a deeper understanding of Pakistan's post-1998 nuclear policy, this book critically examines whether the minimum deterrence conceived could be sustained both at the theoretical and operational levels. It will be a useful contribution in the field of Nuclear Policy, Security Studies, Asian Politics, Proliferation, Non-Proliferation Studies and Peace Studies. This book will be of interest to policy makers, scholars and students of nuclear policy, nuclear proliferation and arms control related research.

Tactical Nuclear Weapons Alistair Millar, Brian Alexander, 2003-07-31 For three decades, arms control treaties have provided a legal basis for limiting and reducing long-range nuclear weapons. However, thousands of sub-strategic or tactical nuclear weapons (TNWs) are not monitored or controlled by any existing treaties or formal agreements even though they can pose security risks equal to or

exceeding those of strategic nuclear weapons As the world has seen the rise of international terrorism highlights the potential dangers of tactical nuclear weapons Because they can be relatively small and portable particularly but not exclusively in the case of so cal Twenty-First Century Weapons Proliferation James M. Ludes, Henry Sokolski, 2014-01-14 Leading US security practitioners from the Ford Carter Reagan Bush and Clinton administrations plus other experts on proliferation clarify the weapons proliferation threats that the US and its allies will face and suggest what new policies their governments should consider

No End in Sight Nathan E. Busch, 2014-10-17 The global threat of nuclear weapons is one of today's key policy issues Using a wide variety of sources including recently declassified information Nathan E Busch offers detailed examinations of the nuclear programs in the United States Russia China Iraq India and Pakistan as well as the emerging programs in Iran and North Korea He also assesses the current debates in international relations over the risks associated with the proliferation of nuclear weapons in the post Cold War world Busch explores how our understanding of nuclear proliferation centers on theoretical disagreements about how best to explain and predict the behavior of states His study bridges the gap between theory and empirical evidence by determining whether countries with nuclear weapons have adequate controls over their nuclear arsenals and fissile material stockpiles such as highly enriched uranium and plutonium Analyzing the strengths and weaknesses of various systems of nuclear weapons regulation Busch projects what types of controls proliferating states are likely to employ and assesses the threat posed by the possible theft of fissile materials by aspiring nuclear states or by terrorists No End in Sight provides the most comprehensive and up to date analysis of issues at the forefront of contemporary international affairs With the resurgence of the threat of nuclear terrorism Busch's insights and conclusions will prove critical to understanding the implications of nuclear proliferation

Critical Reflections on Security and Change Stuart Croft, Terry Terriff, 2013-02-01 The contributors reflect critically on security studies since the 1980s They conclude that analysts and policy makers have not been able to respond well to the changes that have occurred and that they must revise their approach if they are to meet the challenges of the future

Decommissioned Russian Nuclear Submarines and International Cooperation Charles Krupnick, 2017-07-06 With the end of the Cold War Russia's submarines were no longer needed to deter or fight Western navies and were very expensive to operate and maintain Older submarines were taken out of service in large numbers but without firm plans and infrastructure in place to remove and adequately care for their nuclear components problems soon developed over the disposition of spent fuel assemblies Problems arose also of course between Russia and the international community as to the best way to respond to the challenge This book looks at those problems first discussing Russia's economy its environment and the Russian Navy and then covering in detail the spent fuel of Russian submarines and related nuclear problems The engagement of the international community on the issue is then addressed A theoretical analysis is offered on how Russia's fellow nations can help remedy a troubling environmental problem in a difficult country

Williamson, Solomon Polachek, Bruce Bueno de Mesquita, 2014-08-29 It is a puzzle that while academic research has increased in specialization the important and complex problems facing humans urgently require a synthesis of understanding This unique collaboration attempts to address such a problem by bringing together **Reformed Rogue States** Glen Segell, 2006 Glen Segell **Indo-Russian Military and Nuclear Cooperation** Jerome M. Conley, 2001-01-01 In this book Jerome M Conley argues that strained Indo American relations stem from a deep nexus of historical factors Conley begins his examination of the delicate balance of power in the region by looking back to the Moscow New Delhi deal during the Cold War He argues that the dialogue between the United States India and Russia that was established during this era has persisted only because of American ambivalence short term Indian needs and Russian economic trends Consequently the United States must sow the seeds for long term trust and cooperation with India to ensure limited and controlled nuclear expansion This book will appeal to international affairs and security studies scholars foreign policy historians and anyone interested in exploring the complexities of regional strategic arms control *Preventing the Use of Weapons of Mass Destruction* Eric Herring, 2013-01-11 These studies concentrate on preventing the use of weapons of mass destruction A common argument runs through all of the papers that while complacency must be avoided much of the post Cold War focus among Western governments on the threat posed by

weapons of mass destruction is alarmist **Combating Proliferation** Jason D. Ellis, Geoffrey D. Kiefer, 2007-02-23 Selected by Choice Magazine as an Outstanding Academic Title The intelligence community's flawed assessment of Iraq's weapons systems and the Bush administration's decision to go to war in part based on those assessments illustrates the political and policy challenges of combating the proliferation of weapons of mass destruction In this comprehensive assessment defense policy specialists Jason Ellis and Geoffrey Kiefer find disturbing trends in both the collection and analysis of intelligence and in its use in the development and implementation of security policy Analyzing a broad range of recent case studies Pakistan's development of nuclear weapons North Korea's defiance of U N watchdogs Russia's transfer of nuclear and missile technology to Iran and China's to Pakistan the Soviet biological warfare program weapons inspections in Iraq and others the authors find that intelligence collection and analysis relating to WMD proliferation are becoming more difficult that policy toward rogue states and regional allies requires difficult tradeoffs and that using military action to fight nuclear proliferation presents intractable operational challenges Ellis and Kiefer reveal that decisions to use or overlook intelligence are often made for starkly political reasons They document the Bush administration's policy shift from nonproliferation which emphasizes diplomatic tools such as sanctions and demarches to counterproliferation which at times employs interventionist and preemptive actions They conclude with cogent recommendations for intelligence services and policy makers **India**

Since 1980 Sumit Ganguly, Rahul Mukherji, 2011-08-01 This book considers the remarkable transformations that have taken place in India since 1980 a period that began with the assassination of the formidable Prime Minister Indira Gandhi Her death and that of her son Rajiv seven years later marked the end of the Nehru Gandhi era Although the country remains one of the few democracies in the developing world many of the policies instigated by these earlier regimes have been swept away to make room for dramatic alterations in the political economic and social landscape Sumit Ganguly and Rahul Mukherji two leading political scientists of South Asia chart these developments with particular reference to social and political mobilization the rise of the BJP and its challenge to Nehruvian secularism and the changes to foreign policy that in combination with its meteoric economic development have ensured India a significant place on the world stage

Developing a Theoretical Model of Counterproliferation for the 21st Century Brian Bates, Chris McHorney, 2000 Examining counterproliferation as a global phenomenon the authors use an in depth analysis of the Counterproliferation Initiative to develop a theoretical model of counterproliferation for the 21st century Arguing that existing counterproliferation policy is the product of bureaucratic competition the authors propose several modifications of existing policy In the second half of the book they use four case studies Cuban Missile Crisis Persian Gulf War Osirak Reactor Raid and Sudan to identify factors that might contribute to an effective counterproliferation strategy More specifically the authors explore the relationship between the strength of an intelligence gathering apparatus and the successful or unsuccessful elimination of weapons of mass destruction The study concludes with observations and limited predictions regarding the

future of counterproliferation South Asian Cultures of the Bomb Itty Abraham, 2009-03-26 Since their founding as independent nations nuclear issues have been key elements of nationalism and the public sphere in both India and Pakistan Yet the relationship between nuclear arms and civil society in the region is seldom taken into account in conventional security studies These original and provocative essays examine the political and ideological components of national drives to possess and test nuclear weapons Equal coverage for comparable issues in each country frames the volume as a genuine dialogue across this contested boundary **The Kashmir Question** Sumit Ganguly, 2004-03-01 India which had been created as a civic polity initially sought to hold on to this Muslim majority state to demonstrate its secular credentials Pakistan in turn had laid claim to Kashmir because it had been created as the homeland for the Muslims of South Asia After the break up of Pakistan in 1971 the Pakistani irredentist claim to Kashmir lost substantial ground If Pakistan could not cohere on the basis of religion alone it had few moral claims on its co religionists in Kashmir Similarly in the 1980s as the practice of Indian secularism was eroded India s claim to Kashmir on the grounds of secularism largely came apart Today their respective claims to Kashmir are mostly on the basis of statecraft This title provides a comprehensive assessment of a number of different facets of the on going dispute over Kashmir between India and Pakistan Among other matters it examines the respective endgames of both states the evolution of American policy toward the dispute the dangers of nuclear escalation in the region and the state of the insurgency in the Indian controlled portion of the disputed state
