Salvation Martin Heißwolf, 2018-02-14 It is no secret that Christianity has been widely rejected in Japan with less than two percent of the population identifying as Christian. The dominant worldview in Japan is deeply animistic with beliefs such as the Japanese mana concept, the Japanese soul concept, and the concept of God/gods/kami being deeply rooted in the culture and fundamentally influencing society. Dr. Martin Heißwolf, with his years of experience in Japan, critically examines Japanese animism in light of core Christian beliefs such as the concepts of peace and salvation. Central to Japanese people's rejection of Christian truth is the diametric opposition of its supernatural message to the natural focus of Japanese animistic folk religion. Heißwolf's meticulous study is framed squarely within missiological thought and praxis, so Christians serving in Japanese contexts are better able to communicate the message of the gospel by more fully understanding Japanese people, people by whom God wants to be known.

Serving Library Users from Asia John Hickok, 2019-06-12 Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published (e.g., disabled, Latino seniors, etc.), few books on serving library users of Asian heritage have been written. Thus, the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters, each on 24 specific Asian countries/cultures of East, Southeast, and South Asia, with a wealth of resources for understanding, interacting with, outreaching to, and serving library users of each culture. Resources include cultural guides, both print and online; language helps with sample library vocabulary; Asian booksellers; nationwide cultural groups; professional literature; and more. Resources and suggestions are given for all three types of libraries: public, school, and academic, making this book valuable for all librarians. The demographics of each Asian culture, numbers and distribution, plus history of immigration and international student enrollment, is also featured. As a bonus, each chapter spotlights a US public school and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems, and more of public, school, and academic libraries are all discussed with detailed documentation. Country conditions influencing libraries and library use are also described; literacy levels, reading cultures, languages, and writing systems, educational systems, and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.
