Cultivated Power expands our knowledge of flowers in European history beyond the Dutch tulip mania and restores our understanding of the importance of flowers in the French classical garden. The book also develops a fuller perspective on the roles of gender, rank, and material goods in the age of the baroque. Using flowers to analyze the movement of culture in early modern society, Cultivated Power ultimately highlights the influence of curious florists on the taste of the king and the extension of the cultural into the realm of the political.
